

James Richard Forbes

Professor, William Dawson Scholar
james.richard.forbes@mcgill.ca

Department of Mechanical Engineering, McGill University
Macdonald Engineering Building, Room 158
817 Sherbrooke St. West, Montreal, QC, Canada, H3A 0C3

Research Interests

State Estimation and Navigation

Nonlinear state estimation, Kalman-like filters (e.g., extended Kalman filter (EKF), sigma point Kalman filter, invariant EKF), batch methods, variational inference, nonlinear deterministic observers, simultaneous localization and mapping (SLAM), estimation of systems with matrix Lie group states (e.g., $SO(3)$, $SE(3)$, homography), constrained state estimation, Koopman-based navigation, machine-learning-based approaches to enhance navigation.

Control Systems

Robust control, optimal control, controller synthesis via linear matrix inequalities (LMIs), μ analysis and synthesis, gain-scheduled control, input-output stability analysis and control, QSR dissipativity, control of systems with matrix Lie group states, Koopman-based control, optimization as a control problem.

Guidance

Extremum seeking guidance, guidance of systems with matrix Lie group states.

Machine Learning and System Identification

Applications of Gaussian-process regression, Koopman-operator-based system identification, time- and frequency-domain system identification.

Robotics and Aerospace Engineering Applications

Multicopter and fixed-wing unmanned aerial vehicles (UAVs), autonomous underwater vehicles (AUVs), autonomous ground vehicles (AGVs) such as rail vehicles, on- and off-road vehicles, and spherical (rolling) robots, flexible robotic manipulators, spacecraft, cable-actuated robots, wind-energy-harvesting kites, system identification of vehicles.

Social Media: decar.ca, Instagram, X/Twitter, LinkedIn, YouTube.

University Education

November 10, 2011	Doctor of Philosophy , Aerospace Science and Engineering University of Toronto Institute for Aerospace Studies Toronto, ON, Canada Thesis Title: <i>Extensions of Input-Output Stability Theory and the Control of Aerospace Systems</i> Supervisor: Prof. Christopher Damaren Thesis committee: Prof. Timothy Barfoot and Prof. Hugh Liu Winner of the 2011 G.N. Patterson Award for the most outstanding PhD thesis.
June 16, 2008	Master of Applied Science , Aerospace Science and Engineering University of Toronto Institute for Aerospace Studies Toronto, ON, Canada

Thesis Title: *Design of Optimal Strictly Positive Real Controllers Using Numerical Optimization for the Control of Large Flexible Space Structures*
Supervisor: Prof. Christopher Damaren

June 17, 2006 **Bachelor of Applied Science**, Honours Mechanical Engineering, Co-op
University of Waterloo
Waterloo, ON, Canada
Dean's Honours, with distinction.
Fourth-Year Project Title: *Design of a Linear Electromagnetic Actuator*
Fourth-Year Project Supervisor: Prof. Behrad Khamesee

Professional Appointments, Affiliations, Qualifications, and Memberships

Academic Appointments

May 1, 2025 - Present	Professor Dept. of Mechanical Engineering, McGill University Macdonald Engineering Building 817 Sherbrooke St. West, Montreal, QC, Canada, H3A 0C3
June 1, 2018 - May 1, 2025	Associate Professor Dept. of Mechanical Engineering, McGill University Macdonald Engineering Building 817 Sherbrooke St. West, Montreal, QC, Canada, H3A 0C3
April 30, 2018 - Present	William Dawson Scholar, McGill University
August 1, 2015 - May 30, 2018 & May 16, 2011 - August 31, 2013	Assistant Professor Dept. of Mechanical Engineering, McGill University Macdonald Engineering Building 817 Sherbrooke St. West, Montreal, QC, Canada, H3A 0C3
September 1, 2013 - June 30, 2015	Assistant Professor Dept. of Aerospace Engineering, University of Michigan FXB Building 1320 Beal Avenue, Ann Arbor, MI, USA, 48109 - 2140

Professional Affiliations

September 22, 2025 - Present	Associate Academic Member Mila - Quebec Artificial Intelligence Institute 6666 Saint-Urbain Street, Montreal, QC, H2S 3H1
December 2, 2022 - Present	Member Trottier Institute for Sustainability in Engineering and Design (TISED) Macdonald Engineering Building McGill University 817 Sherbrooke Street West, Montreal, QC, H3A 0C3

September 20, 2022 - Present	Member Centre de Recherches Mathématiques (CRM) Pavillon André-Aisenstadt 2920 Chemin de la tour, Montréal, QC, Canada, H3T 1J4
December 9, 2016 - Present	Member Groupe d'études et de recherche en analyse des décisions (GERAD) HEC Montréal 3000 Côte-Sainte-Catherine, Montréal, QC, Canada, H3T 2A7
October 16, 2015 - Present	Member Regroupement pour l'étude des environnements partagés intelligents répartis (REPARTI) Faculté des sciences et de génie - Pavillon Pouliot Université Laval Québec, QC, Canada, G1K 7P4
October 16, 2015 - Present	Full Member Centre for Intelligent Machines (CIM) McConnell Engineering Building McGill University 3480 University Street, Montreal, QC, Canada, H3A 0C3

Professional Qualifications

July 21, 2017 - Present	Licensed Engineer Professional Engineers of Ontario (PEO).
June 16, 2017 - Present	Certificate of Proficiency in Amateur Radio (Basic)

Professional Memberships

2011 - Present	Member, Institute of Electrical and Electronics Engineers (IEEE)
2012 - 2018	Member, American Institute for Aeronautics and Astronautics (AIAA)
2017 - 2018	Member, American Society for Engineering Education (ASEE)
2012 - 2018	Member, Canadian Aeronautics and Space Institute (CASI)

Books

- [B1] A. H. J. de Ruiter, C. J. Damaren, and J. R. Forbes, *Spacecraft Dynamics and Control, An Introduction*. West Sussex, UK: John Wiley & Sons, Ltd., 2013.

Theses

- [T1] J. R. Forbes, *Extensions of Input-Output Stability Theory and the Control of Aerospace Systems*. Ph.D. Thesis, University of Toronto, 2011.

[T2] J. R. Forbes, *Design of Optimal Strictly Positive Real Controllers Using Numerical Optimization for the Control of Large Flexible Space Structures*. M.A.Sc. Thesis, University of Toronto, 2008.

Industrial Patents

- [IP1] J. I. Saari, J. R. Forbes, N. Quitariano, and G. Roberts, “Chemical Sensor That Are Adaptable to Mobile Devices,” Patent Issued June 13, 2017. Canadian Patent Number: 869313.
- [IP2] J. I. Saari, N. Quitariano, J. R. Forbes, and G. Roberts, “Sensor Systems and Methods for Analyte detection,” Patent Issued March 24, 2016. Patent Number: US-20160084705.
- [IP3] P. Kambhampati, J. I. Saari, N. Quitariano, J. R. Forbes, and G. Roberts, “Systems for Detecting Target Chemicals and Methods for their Preparation and Use,” Patent Issued March 24, 2016. Patent Number: US-20160084810.

Presentations

Speaker indicated by “★”.

- [P1] J. R. Forbes★, “Learning Dynamic Systems with the Koopman Operator,” *Taylor Symposium on Applied AI, May 15, 2026*.
- [P2] J. R. Forbes★, “Robot Navigation using Ultra-Wideband Radio,” *University of Toronto, Robotics Institute, November 21, 2025*.
- [P3] J. R. Forbes★, “Gaussian Variational Inference for Batch Nonlinear State Estimation Applied to Robot Navigation,” *Department of Electrical Engineering, Eindhoven University of Technology, September 25, 2024*.
- [P4] J. R. Forbes★ and S. Dahdah, “Closed-loop Koopman Operator Approximation,” *Fourth Symposium on Machine Learning and Dynamical Systems, Toronto, ON, July 8-12, 2024*. **Invited Speaker.**
- [P5] S. S. Ahmed★, M. A. Shalaby, J. L. Ny, and J. R. Forbes, “Optimal Robot Formations: Balancing Range-Based Observability and User-Defined Configurations,” *ICAO Symposium, Montreal, QC, March 13, 2024*.
- [P6] J. R. Forbes, “SPRINT-Navs and Collabs,” *Soundwaves, The Sonardyne Podcast, March 1, 2024*.
- [P7] J. R. Forbes, “Multi-robot Relative Localization using Ultra-wideband Radio,” *RoboHacks, McGill University, Montreal, QC, February 17, 2024*.
- [P8] J. R. Forbes★ and T. Hitchcox, “Subsea Navigation and Mapping Using an Underwater Laser Scanner,” *ETH Zurich, Dep. of Mechanical and Process Engineering, Zurich, Switzerland, October 27, 2023*. **Invited Speaker.**
- [P9] J. R. Forbes★ and T. Hitchcox, “Subsea Navigation and Mapping Using an Underwater Laser Scanner,” *University of Klagenfurt, Department of Smart System Technologies, Klagenfurt, Austria, October 24, 2023*. **Invited Speaker.**
- [P10] J. R. Forbes★ and T. Hitchcox, “Subsea Navigation and Mapping Using an Underwater Laser Scanner,” *Australian Centre for Robotics, University of Sydney, Sydney, Australia, July 6, 2023*. **Invited Speaker** (online).
- [P11] J. R. Forbes★ and S. Dahdah, “Data-driven Koopman Operator Approximation,” *Koopman Operator Research Seminar, Dept. Mechanical Engineering, UC Santa Barbara, Santa Barbara, USA, April 21, 2023*. **Invited Speaker** (online).
- [P12] J. R. Forbes★, “Model Predictive Control of a Tandem-rotor Helicopter,” *State University of New York at Buffalo, Department of Mechanical and Aerospace Engineering, Amherst, NY, USA, February 23, 2023*. **Invited Speaker.**

- [P13] J. R. Forbes* and T. Hitchcox, “Field Calibration of Optical Sensor Extrinsic in a Low-Observability Scenario,” *Endurance22 Science Workshop, Bremen, Germany, January 18-19, 2023*.
- [P14] T. Hitchcox* and J. R. Forbes, “INS Drift Correction and Real-Time Subsea Point Cloud Colourization,” *Endurance22 Science Workshop, Bremen, Germany, January 18-19, 2023*.
- [P15] S. Dahdah* and J. R. Forbes, “Learning Robot Dynamics with the Koopman Operator,” *IVADO’s Young Talent Development Program, Mila, October 21, 2022*. Best presentation in the “Algorithms of Tomorrow” session (\$1000 prize).
- [P16] J. R. Forbes*, “Regularization Techniques in Koopman-based System Identification,” *Applied Mathematics Seminars, McGill University, September 12, 2022*.
- [P17] J. R. Forbes*, “Model Predictive Control of a Tandem-rotor Helicopter,” *Dept. Electronics and Computer Science, University of Southampton, June 1, 2022*. **Invited Speaker.**
- [P18] J. R. Forbes*, “Regularization Techniques in Koopman-based System Identification,” *Dept. Engineering Science, University of Oxford, May 30, 2022*. **Invited Speaker.**
- [P19] F. Ahmed and J. R. Forbes*, “Model Predictive Control of a Tandem-rotor Helicopter,” *Optimization Days 2022, HEC Montreal, May 16-18, 2022*.
- [P20] S. Dahdah and J. R. Forbes*, “System Norm Regularization Methods for Koopman Operator Approximation,” *Optimization Days 2022, HEC Montreal, May 16-18, 2022*.
- [P21] J. R. Forbes*, “Regularization Techniques in Koopman-based System Identification,” *Ingenuity Labs Research Institute Lecture Series, Queen’s University, April 20, 2022*. **Invited Speaker.**
- [P22] J. R. Forbes*, “MAME Podcase 1 - Professor James R. Forbes,” *McGill Association of Mechanical Engineers (MAME), August 11, 2020*.
- [P23] J. R. Forbes*, “Gaussian Variational Inference for Batch Nonlinear State Estimation Applied to Robot Navigation,” *Meet a GERAD Researcher Seminar, Universite de Montreal, May 6, 2020*.
- [P24] J. R. Forbes*, “Gaussian Variational Inference for Batch Nonlinear State Estimation Applied to Robot Navigation,” *Robot Learning Seminar Series, Mila, March 20, 2020*. **Invited Speaker.**
- [P25] J. R. Forbes*, “Wind-Velocity Estimation for Enhanced UAV Path Planning and Control,” *Ingenuity Labs Research Institute Lecture Series, Queen’s University, February 12, 2020*. **Invited Speaker.**
- [P26] A. Bianco*, G. Ijpma, R. Zonis, A.-M. Lauzon, and J. R. Forbes, “Control of Nonlinear, Viscoelastic Tissue,” *30th Annual RI-MUHC Research Day on Monday, June 3rd, 2019*.
- [P27] T. Hitchcox* and J. R. Forbes, “Multiscale Gaussian Process Regression for Feature Enhancement in Laser-based Bathymetric SLAM,” *Optimization Days 2019, HEC Montreal, May 13-15, 2019*.
- [P28] K. Lee* and J. R. Forbes, “Synthesis of Optimal Yet Robust Controllers for Negative Imaginary Systems,” *Optimization Days 2019, HEC Montreal, May 13-15, 2019*.
- [P29] J. R. Forbes* and R. Fortune, “System Identification and Optimal Control of a Fatigue Testing Rig for Aircraft,” *Optimization Days 2019, HEC Montreal, May 13-15, 2019*.
- [P30] J. R. Forbes, “Pose Estimation via the Weighted Optimal Linear Translational Attitude Estimation (WOLATE) Algorithm,” *Lund University, Lund, Sweden, August 20, 2018*. **Invited Speaker.**
- [P31] J. R. Forbes, “ $\mathcal{H}_\infty$ -Optimal Parallel Feedforward Control,” *8th Biennial Meeting on Systems and Control Theory, University of Toronto, Toronto, ON, May 7-9, 2018*.
- [P32] J. R. Forbes, “Extremum-Seeking Guidance on the Special Orthogonal Group,” *Aerial Robotics International Research Symposium, Centre for Aerial Robotics Research and Education (CARRE), Toronto, ON, June 21-22, 2017*. **Invited Speaker.**
- [P33] J. R. Forbes, “Guidance on $SO(3)$ Using a Kalman Filter,” *Tutorial Session “Vision-based Navigation and Perception for Space Systems”, American Control Conference, Seattle, WA, USA, May 24-26, 2017*. **Invited Speaker.**
- [P34] R. J. Caverly* and J. R. Forbes, “Controller Design for Regional Pole and Zero Placement using Linear Matrix Inequalities and the Modified Minimum Gain Lemma,” *Optimization Days 2017, HEC Montreal, May 8-10, 2017*.

- [P35] A. Walsh and J. R. Forbes*, “Extremum-Seeking Guidance on $SO(3)$ Using a Kalman Filter,” *Optimization Days 2017, HEC Montreal, May 8-10, 2017*.
- [P36] D. Qian and J. R. Forbes*, “Exploiting landmark Constraints for Mobile robot Localization and Mapping,” *Optimization Days 2017, HEC Montreal, May 8-10, 2017*.
- [P37] J. R. Forbes, “So, you want to be a Professor, eh?,” *Mech Talks, MAME, McGill University, Montreal, QC, April 4, 2017. Invited Speaker.*
- [P38] R. J. Caverly and J. R. Forbes, “Robust Controller Design using the Large Gain Theorem,” *GERAD Student Day, HEC Montreal, QC, April 11, 2017*.
- [P39] D. Qian* and J. Forbes, “Pose Estimation Using a Novel Computer Vision Algorithm,” *GAMES Graduate Research Day, McGill University, Montreal, QC, March 8, 2017. Awarded Second Place in the Oral Presentation Section.*
- [P40] R. J. Caverly* and J. Forbes, “Dynamics, Estimation, and Control Lab Research Overview,” *McGill Association of Mechanical Engineers (MAME) Mech Lab Tour, McGill University, Montreal, QC, January 23, 2017*.
- [P41] J. R. Forbes, “Observer Design on $SO(3)$,” *G  RAD, Montreal, QC, December 2, 2016. Invited Speaker.*
- [P42] J. R. Forbes, “State Estimation for Aerial Vehicles — Probabilistic and Deterministic Approaches ,” *KittyHawk, Mountain View, CA, USA, November 17, 2016. Invited Speaker.*
- [P43] J. R. Forbes, “Robust Control of Flexible Spacecraft,” *Arizona State University, Department of Mechanical and Aerospace Engineering, Tempe, AZ, USA, October 28, 2016. Invited Speaker.*
- [P44] R. J. Caverly* and J. Forbes, “Robust Controller Design via the Large Gain Theorem,” *Third Annual CIM-REPARTI Research Showcase, Centre for Intelligent Machines (CIM), McGill University, Montreal, QC, October 19, 2017*.
- [P45] J. R. Forbes, “Dynamic Modeling, Estimation, and Control of Cable-Actuated Robots,” *William Maxwell Reed Seminar Series Invited Speaker, University of Kentucky, Department of Mechanical and Aerospace Engineering, Lexington , KY, USA, October 14, 2016*.
- [P46] R. J. Caverly* and J. Forbes, “The Large Gain Theorem and its Applications,,” *Informal Systems Seminar (ISS), McGill University, Montreal, QC, October 7, 2017*.
- [P47] J. R. Forbes, “Control and Estimation on the Special Orthogonal Group of Rigid-Body Rotations . . . and Other Adventures,” *State University of New York at Buffalo, Department of Mechanical and Aerospace Engineering, Amherst, NY, USA, September 29, 2016. Invited Speaker.*
- [P48] J. R. Forbes, “How to be Successful in Your NSERC Fellowship Application — My Thoughts on the Process,” *How to be Successful in Your NSERC Fellowship Application Workshop, SKILLSETS, McGill University, Montreal, QC, August 31, 2015, August 29, 2016. Invited Speaker.*
- [P49] J. R. Forbes, “Observer Design on $SO(3)$ - Fast Convergence and Practical Considerations,” *7th Biennial Meeting on Systems and Control Theory, Queen’s University, Kingston, ON, May 11-13, 2016*.
- [P50] J. R. Forbes, “Dynamic Modeling, Estimation, and Control of Cable-Actuated Robots,” *Max Planck Institute for Biological Cybernetics, T  bingen, Germany, May 10, 2016. Invited Speaker.*
- [P51] J. R. Forbes, “Estimation on $SO(3)$,” *Mini-symposium on Geometry in Mechanics in Honour of Paul Zsombor-Murray’s 80th Birthday, McGill University, Montreal, QC, April 22, 2016. Invited Speaker.*
- [P52] L. J. Bridgeman* and J. R. Forbes, “Methods Revitalizing Input-Output Stability Analysis,” *2016 Mechanical Engineering Graduate Research Day, McGill University, Montreal, QC, March 10, 2016. Co-winner for best presentation.*
- [P53] R. J. Caverly* and J. R. Forbes, “Robust Controller Design using the Large Gain Theorem,” *2016 Mechanical Engineering Graduate Research Day, McGill University, Montreal, QC, March 10, 2016*.

- [P54] R. J. Caverly* and J. Forbes, “Dynamics, Estimation, and Control Lab Research Overview,” *McGill Association of Mechanical Engineers (MAME) Mech Lab Tour, McGill University, Montreal, QC, January 19, 2016.*
- [P55] J. R. Forbes, “Becoming an Engineering Academic: My Road to McGill,” *MIAE Guest Speaker Series Event, McGill University, Montreal, QC, October 6, 2015. Invited Speaker.*
- [P56] J. R. Forbes, “Control and Estimation on the Special Orthogonal Group of Rigid-Body Rotations ... and Other Adventures,” *Texas A & M University, Department of Aerospace Engineering, Collage Station, TX, USA, September 24, 2015. Invited Speaker.*
- [P57] D. E. Zlotnik* and J. R. Forbes, “A Nonlinear Attitude Estimator with Desirable convergence Properties,” *First Michigan Aerospace Control Conference (MACC), University of Michigan, Ann Arbor, MI, USA, May 18, 2015.*
- [P58] S. A. Chee* and J. R. Forbes, “Modeling and Estimation of Flexible Space Debris,” *First Michigan Aerospace Control Conference (MACC), University of Michigan, Ann Arbor, MI, USA, May 18, 2015.*
- [P59] R. J. Caverly* and J. R. Forbes, “Modeling and Control of a Wind Energy Harvesting Flexible Kiteplane,” *First Michigan Aerospace Control Conference (MACC), University of Michigan, Ann Arbor, MI, USA, May 18, 2015.*
- [P60] J. R. Forbes, “The Conic Sector Theorem: The Past, The Present, The Future,” *University of Notre Dame Dept. of Electrical Engineering Systems Seminar, Notre Dame, IN, USA, April 10, 2015. Invited Speaker.*
- [P61] J. R. Forbes, “Estimation and Control of Aerial Robotic Systems,” *IEEE Robotics and Automation Society, Southeastern Michigan Chapter, Lawrence Technological University, Southfield, MI, USA, March 21, 2015. Invited Speaker.*
- [P62] J. R. Forbes, “Flexible Aircraft Modeling and Gain-Scheduled Control,” *Air Force Research Laboratory, Wright-Patterson Air Force Base, Dayton, OH, USA, February 17, 2015. Invited Speaker.*
- [P63] J. R. Forbes, “Attitude Estimation on $SO(3)$,” *Air Force Research Laboratory, Kirtland Air Force Base, Albuquerque, NM, USA, January 26, 2015. Invited Speaker.*
- [P64] J. R. Forbes, “Recent Developments in Attitude Estimation and the Control of Flexible Aircraft,” *NASA Armstrong Flight Research Center, Edwards Air Force Base, CA, USA, December 18, 2014. Invited Speaker.*
- [P65] J. R. Forbes, “Attitude Estimation and Control of Spacecraft and Large Flexible Space Structures,” *Jet Propulsion Laboratory, Pasadena, CA, USA, December 16, 2014. Invited Speaker.*
- [P66] J. R. Forbes, “Control and Estimation of Aerospace Systems,” *Presentation given to the Department of Aerospace Engineering, University of Michigan, Ann Arbor, MI, USA, December 12, 2014.*
- [P67] J. R. Forbes, “Control and Estimation of Aerospace Systems,” *Presentation given to the Department of Aerospace Engineering’s Industrial Advisory Board, University of Michigan, Ann Arbor, MI, USA, October 24, 2014.*
- [P68] J. R. Forbes, “Borne To Point — Dynamic Modeling, Estimation, and Control of Balloon-Borne Payloads,” *Aerospace Control and Guidance Systems Committee Meeting #114, Cleveland, OH, USA, October 15-17, 2014. Invited Speaker, awarded “Best Presentation” Award.*
- [P69] J. R. Forbes, “Dynamic Modeling, Estimation, and Control of Aerospace Systems,” *Universities Space Research Association, Madison, WI, USA, October 9, 2014. Invited Speaker.*
- [P70] J. R. Forbes, “Guidance, Navigation, and Control Techniques for Balloon-Borne Payloads,” *NASA Glenn Research Center, Cleveland, OH, USA, April 7, 2014. Invited Speaker.*
- [P71] J. R. Forbes, “High-Altitude Balloon Navigation, Guidance, and Control,” *Google, Mountain View, CA, USA, January 31, 2014. Invited Speaker.*
- [P72] J. R. Forbes, “Dynamic Modelling, Estimation, and Control of High-Altitude Balloons, Spherical Rovers, and Spacecraft,” *Jet Propulsion Laboratory, Pasadena, CA, USA, January 30, 2014. Invited Speaker.*

- [P73] J. R. Forbes, "Spacecraft Attitude Estimation and Control: Norm-Constrained Kalman Filtering and Actuator Saturation Prevention," *The Aerospace Corporation, Los Angeles, CA, USA, January 28, 2014. Invited Speaker.*
- [P74] J. R. Forbes, "Gain-Scheduled Control Within a Passive Systems Framework," *NASA Dryden Flight Research Center, Edwards Air Force Base, CA, USA, January 27, 2014. Invited Speaker.*
- [P75] J. R. Forbes, "Gain-Scheduled Control Within a Passive Systems Framework," *NASA Ames Research Center, Mountain View, CA, USA, December 11, 2013. Invited Speaker.*
- [P76] J. R. Forbes, "Guidance, Navigation, and Control Techniques for Balloon-Borne Payloads," *NASA Glenn Research Center, Cleveland, OH, USA, December 3, 2013. Invited Speaker.*
- [P77] J. R. Forbes, "Practicable Rotation-Matrix-Based Attitude Control," *Control Systems Seminar, University of Michigan, Ann Arbor, MI, USA, November 8, 2013.*
- [P78] J. R. Forbes, "Attitude Sensing and Control of Small Balloon-Borne Payloads," *NASA Glenn Research Center, Cleveland, OH, USA, October 22, 2013. Invited Speaker.*
- [P79] L. J. Bridgeman* and J. R. Forbes, "Conic-Sector-Based Control to Circumvent Passivity Violations," *Department of Electrical Engineering, University of Notre Dame, South Bend, ID, USA, May 23, 2013.*
- [P80] L. J. Bridgeman* and J. R. Forbes, "Conic-Sector-Based Control to Circumvent Passivity Violations," *2013 Optimization Days, Montreal, QC, Canada, May 6-8, 2013.*
- [P81] J. R. Forbes, "Attitude Control and Estimation of Aerospace Systems," *AEROSP 585 - Aerospace Engineering Seminar, Department of Aerospace Engineering, University of Michigan, Ann Arbor, MI, USA, March 12, 2013. Invited Speaker.*
- [P82] J. R. Forbes, "Control and Estimation of Aerospace and Robotic Systems," *Presented to Lockheed Martin personnel, McGill University, Montreal, QC, June 4, 2012.*
- [P83] J. R. Forbes, "Control of Aerospace Systems," *McGill-CSA Space Day, McGill University, Montreal, QC, March 1, 2012. Invited Speaker.*
- [P84] J. R. Forbes, "Becoming an Engineering Academic: My Road to McGill," *McGill Association of Mechanical Engineers, McGill University, Montreal, QC, February 28, 2012. Invited Speaker.*
- [P85] J. R. Forbes, "Passivity-Based Control Using the Rotation Matrix (and Other Adventures)," *Informal Systems Seminar, Centre for Intelligent Machines, McGill University, Montreal, QC, December 15, 2011.*
- [P86] J. R. Forbes, "Linear, Nonlinear, and Optimal Passivity-Based Control," *Dynamics and Control Seminar, Sibley School of Mechanical and Aerospace Engineering, Cornell University, Ithaca, NY, USA, December 5, 2011. Invited Speaker.*
- [P87] J. R. Forbes, "Conic Sectors and the Conic Sector Theorem: The Past, the Present, and the Future," *Informal Systems Seminar (ISS), McGill University, Montreal, QC, November 18, 2011.*
- [P88] J. R. Forbes, "Advances in Passivity-Based Control for Aerospace Systems," *AEROSP 585 - Aerospace Engineering Seminar, Department of Aerospace Engineering, University of Michigan, Ann Arbor, MI, USA, September 15, 2011. Invited Speaker.*
- [P89] J. R. Forbes, "Advances in Passivity-Based Control for Aerospace Systems," *presented to the UTAIS Advisory Board, UTIAS, Toronto, ON, May 12, 2011.*
- [P90] J. R. Forbes* and C. J. Damaren, "Flexible Manipulator Control Accommodating Passivity Violations," *Space Vision and Advanced Robotics Workshop 2011, MDA Space Missions, Brampton, ON, June 8, 2011.*
- [P91] J. R. Forbes, "Extended Kalman Filter and Sigma Point Filter Approaches to Adaptive Filtering," *Space Vision and Advanced Robotics Workshop 2010, MDA Space Missions, Brampton, ON, June 9, 2010.*

- [P92] J. R. Forbes* and C. J. Damaren, “Flexible Manipulator Control Accommodating Passivity Violations: Theory and Experiments,” *Meeting on Systems and Control Theory, Queen’s University, Kingston, ON, May 13-15, 2010*.
- [P93] J. R. Forbes, “Robust Control of a Vibrating Beam Using the Hybrid Passivity and Finite Gain Stability Theorem,” *International Astronautical Congress, Daejeon, Republic of Korea, October 16-19, 2009*.
- [P94] J. R. Forbes* and C. J. Damaren, “Design of Gain-Scheduled SPR Controllers Using Numerical Optimization to Control Flexible Space Systems,” *Space Vision and Advanced Robotics Workshop 2009, MDA Space Missions, Brampton, ON, June 3, 2009*.

Public Media Citations and Interviews

November 9, 2024	Nico Vincent interviewed by Matthieu Dugal on the Radio Canada program “Moteur de recherche”. Mr. Vincent explained DECAR and Voyis’ contribution to the surveying of the Endurance shipwreck.
October 17, 2024	Interview with La Presse regarding the Endurance shipwreck.
October 15, 2024	Interview with CityNews Montreal regarding the Endurance shipwreck.
October 12, 2024	Interview with the Montreal Gazette regarding the Endurance shipwreck.
October 11, 2024	Interviewed by Jill Bennett for the Jill Bennett Show on CKNW (Vancouver).

Awards, Recognition, and Nominations

April 2, 2026	Winner of the Donald L. Mordell EUS Teaching Excellence Award
May 22, 2025	International Conference on Robotics and Automation (ICRA) best paper award for the paper: Zi Cong Guo, James R. Forbes, Timothy D. Barfoot, “Marginalizing and Conditioning Gaussians onto Linear Approximations of Smooth Manifolds with Applications in Robotics,” International Conference on Robotics and Automation, Atlanta, GA, May 19-23, 2025
April 24, 2024	Winner of the Samuel and Ida Fromson Outstanding Teaching Award in Engineering
June 2021	International Conference on Robotics and Automation (ICRA) best student paper award finalist (1 of 4 finalists) for the paper: M. Shalaby, C. C. Cossette, J. Le Ny, and J. R. Forbes, “Cascaded Filtering Using the Sigma Point Transformation,” <i>IEEE Robotics and Automation Letters</i> , vol. 6, no. 3, pp. 4758-4765, 2021. Jointly accepted to ICRA.
April 2020	Winner of the Carrie M. Derick Award for Graduate Supervision and Teaching
January 25, 2020	The paper “DReCon: Data-Driven responsive Control of Physics-Based Characters” co-authored by Prof. Forbes, MSc student K. Bergemin, and collaborators from Ubisoft La Forge featured on “Two Minute Papers”: https://youtu.be/o_DhNqHazKY
May 31, 2017	Winner of the Engineering Class of 1944 Outstanding Teaching Award

2017, 2014	Nominated for the ACGSC Dave Ward Memorial Lecture Award
April 7, 2016	Winner of the McGill Association of Mechanical Engineers (MAME) “Professor of the Year”
March 12, 2015	Nominated for the University of Michigan’s Golden Apple Award that honours instructors who aim to “. . . not only to disseminate knowledge but inspire and engage students in its pursuit”.
2012	Nominated for the Governor General’s Gold Medal for the highest academic standing at the graduate level.
November 3, 2011	G.N. Patterson Award , given to the most outstanding Ph.D. graduate of UTIAS.
2011 - 2013	NSERC Post Doctoral Fellowship (awarded but declined)
August 3, 2010	AIAA Graduate Student Paper Competition Finalist
2008 - 2011	Ontario Graduate Scholarship
2009	Canadian Space Agency Travel Award
2009	Bronze “T” Award, Varsity Lacrosse, University of Toronto
2007 - 2008	Ontario Graduate Scholarship in Science and Technology
2005-2006	University of Waterloo Faculty of Engineering Upper-Year Scholarship

Conference Awards

October 21, 2022	“Best presentation” in the “algorithms of tomorrow” session at IVADO’s Young Talent Development event. Work co-authored by S. Dahdah and J.R. Forbes. Presentation given by S. Dahdah.
July 6-8, 2016	“Best presentation” in Robust Control I session, American Control Conference, Boston, MA, USA.
June 1-3, 2015	“Best presentation” in Control Applications II session, American Control Conference, Chicago, IL, USA.
June 4-6, 2014	“Best presentation” in Robust Control I session, American Control Conference, Portland, OR, USA.
May 28-31, 2013	“Best student paper”, 10 th Conference on Computer and Robot Vision (CRV 2013), Regina, SK, Canada.
August 13-16, 2012	“Best presentation” in Control in Aerospace Robotics 1 session, AIAA Guidance, Navigation, and Control Conference, Minneapolis, MN, USA.
August 8-11, 2011	“Best presentation” in Optimal Control session, AIAA Guidance, Navigation, and Control Conference, Portland, OR, USA.

Research Grants

McGill University

Research Grants Awarded

- NSERC Alliance with Provectus Robotics Solutions (PI) \$515,013 CAD + industry in-kind, 2025-2027
Multi-modal Calibration and Multi-robot Navigation in Unstructured Environments

- United Arab Emirates University (Co-PI) \$300,000 CAD, 2026-2027
Reinforcement Learning and Energy-Efficient TinyML Approach for VTOL UAVs
- Canadian Space Agency (Co-PI) \$73,500 CAD, 2024-2026
Advancing Deep Space Propulsion Technology Using High-Altitude Balloon Platforms
- NSERC CREATE ADVENTOR Training Program (Co-PI) \$1,515,000 CAD, 2024-2030
Advanced Engineering and Training in Next-Generation Mobile Robotics for Human Spaces
- Mitacs Accelerate with ARA Robotique, Inc. \$36,000 CAD, 2024
Pose Estimation of Objects of Interest by Aerial Multirotor Drone
- NSERC Alliance/Mitacs with Voyis and Ontario Power Generation (PI) \$513,444 CAD + industry in-kind, 2023-2028
Multi-Sensor Navigation and Scene Reconstruction in Subsea Environments
- NSERC Alliance with Hydro-Quebec's Research institute (IREQ) and OPAL-RT Technologies Inc. (PI) \$116,536 CAD + industry in-kind, 2023-2025
Development of Robust Power-Hardware-In-the-Loop Interface Algorithms
- **NSERC Discovery Grant** \$250,000 CAD (\$50,000/year), 2023 - 2028
Enhanced Robustness and Performance of Navigation Solutions for Robotic Vehicles
- DND/NSERC Discovery Grant Supplements \$120,000 CAD (\$40,000/year), 2023 - 2026
Enhanced Robustness and Performance of Navigation Solutions for Robotic Vehicles
- FRQNT NOVA (Co-PI) \$225,000 CAD, 2023-2026
Multi-UAV Active Simultaneous Localization and Mapping in Unknown Indoor Environments
- Mitacs Accelerate with Haply \$45,000 CAD, 2022-2024
Improving Dynamic Range by Using Rich Sensing and Gain-scheduled Control for Improved Haptic Feedback
- NSERC Alliance Mission with ARA Robotique, Inc. (PI) \$441,872 CAD + industry in-kind, 2022-2024
Infrastructure Inspection Using a Team of Unmanned Aerial Vehicles
- Mitacs Accelerate with SBQuantum + IVADO Supplement \$45,000 CAD, 2021
Simultaneous localization and mapping using a magnetic quantum sensor
- NSERC Alliance with Denso \$89,366 CAD + industry cash and in-kind, 2021-2024
Automotive Visual-inertial Navigation
- IVADO projets de recherche fondamentale (co-PI) \$224,598 CAD, 2020-2022
Differentiable perception, graphics, and optimization for weakly supervised 3D perception
- Mitacs Accelerate with Mecademic, Inc. \$90,000 CAD, 2021-2023
Data-Driven Control of an Ultracompact Industrial Robot
- Mitacs Accelerate with NGC Aerospace, Inc. \$60,000 CAD, 2020-2022
Guidance and Control of a Tandem-rotor Helicopter Landing on a Moving Platform
- Mitacs Accelerate with ARA Robotique, Inc. \$30,000 CAD, 2020-2021
Tightly coupled visual-inertial-LIDAR SLAM for real time application
- CIFAR AI Catalyst Grant (co-PI) \$100,000 CAD (\$50,000/year), 2020-2022
Modeling Embodied Agents with Koopman Embeddings
- IDeAS (co-PI) \$1,583,025 + in kind, 2020-2023
Cooperative Network of Autonomous Unmanned Vehicles Protection, Trustworthiness, and Resilient Recovery Subject to Faults and Cyber Attacks
- Mitacs Accelerate with ARA Robotique, Inc. \$15,000 CAD, 2020
Wind Field Estimation, Exploitation and Guidance for Unmanned Aerial Vehicles
- Mitacs Accelerate with Thales \$30,000 CAD, 2020
Constrained Batch Estimation for Train Positioning with Inertial Sensors
- Research Contract with the Carolina Hurricanes Hockey Club \$155,400 CAD, 2020-2023

- Data-Driven Decision Making Using Player and Puck Tracking Data*
- Research Contract with Mecademic \$51,800 CAD, 2020-2022
 - Research Contract with Mecademic \$28,000 CAD, 2019-2020
 - Mitacs Accelerate with ARA Robotique, Inc. (co-PI) \$30,000 CAD, 2019-2020
- Tightly-coupled Visual-Inertial-LiDAR SLAM*
- Mitacs Accelerate with Mecademic, Inc. \$53,333 CAD, 2019
- High-Performance Control of an Ultra-Compact Industrial Robot Arm*
- Mitacs Accelerate with Reaction Dynamics \$15,000 CAD, 2019
- Research and Experimental Testing of Liquid-Injection Thrust Vector Control Actuator (LITVC)*
- Mitacs Accelerate with Thales \$30,000 CAD, 2019
- Constrained Kalman Filtering for Train Position Estimation*
- NSERC Engage with Reaction Dynamics \$25,000 CAD, 2019
- Control, Navigation and Guidance Concept Studies [Pre-Phase A] for a Venture Class Orbital Launch Vehicle (5 - 150kgs)*
- Mitacs Accelerate with ARA Robotique, Inc. \$30,000 CAD, 2019
- Guidance and Control of Hybrid Vertical Takeoff and Landing (VTOL) Unmanned Aerial Vehicles (UAVs) with Thrust Vectoring Capabilities*
- Canadian Foundation for Innovation JELF \$125,000 CAD, 2019-2022
- State Estimation Enabling Autonomous Operation of Robotic Vehicles*
- Mitacs Accelerate with Ubisoft, Inc. \$30,000 CAD, 2018
- RLCapture: A deep reinforcement learning based control strategy for switching between motion capture inspired controllers*
- Mitacs Accelerate with GlobVision, Inc. \$16,850 CAD, 2018-2019
- Detection of spacecraft maneuvers based on publicly available data*
- Mitacs Accelerate with ARA Robotique, Inc. \$30,000 CAD, 2018-2019
- Weighted Linear Point-cloud Registration for Scan-matching in GPS-denied environments*
- NSERC Collaborative Research and Development (CRD) with 2G Robotics, Inc. (PI) \$377,668 CAD (\$94,417/year) + industry cash and in-kind, 2018-2022
- Enhancing Subsea Navigation Capabilities*
- Research Contract with National Research Council of Canada \$90,000 CAD, 2017-2019
- FASTER - Fatigue Structural Testing Enhancement Research*
- FRQNT Projets de recherche en équipe (co-PI) \$205,740 CAD, 2018-2021
- Cooperative Navigation and Control of Mobile Robots Using UWB Radio*
- NSERC Collaborative Research and Development (CRD) Grant with CMLabs, Inc. (co-PI) \$450,000 CAD, 2018-2021
- Efficient Modelling and Simulation of Mechanical Systems*
- NSERC Connect \$3,525 CAD, 2017
- Facilitation meeting with 2G Robotics*
- Mitacs Accelerate with ARA Robotique, Inc. \$30,000 CAD, 2017-2018
- 3D RFM SLAM for UAVs Subject to Severe Vibration*
- NSERC Engage with ARA Robotique, Inc. \$25,000 CAD + \$10,000 CAD CRIAC Sup., 2017
- GPS/INS Performance Enhancement for UAVs*
- NSERC Engage with GlobVision, Inc. \$25,000 CAD + \$10,000 CAD CRIAC Supplement, 2016
- Advanced Data Analysis to Enhance Space Situational Awareness*
- **NSERC Discovery Grant** \$198,000 CAD (\$33,000/year), 2016 - 2023
- Enhanced Performance, Stability, and Practicability of Attitude and Position Estimators for Robotic Vehicles*
- CFI Leaders Opportunity Fund \$125,000 CAD, 2013 - 2018

Practicable Control, Estimation, and Sensing Methods for Aerospace and Robotics Systems

- Canadian Space Agency (co-PI) \$24,000 CAD, 2013 - 2014
ALTAIR: Flights for Precision Calibration for Dark Energy, Microwave Astronomy, and Atmospheric Physics
The amount \$24,000 CAD represents my share of a larger grant PI'ed by Profs. J. Albert (UVic).
- **FRQNT Établissement de Nouveaux Chercheurs** \$81,586 CAD, 2012 - 2014
Control and Estimation of Dynamic Systems on the Special Orthogonal Group
- **NSERC Discovery Grant** \$115,000 CAD (\$23,000/year), 2012 - 2017
Development of Novel Input-Output Control Schemes for Mechanical, Aerospace, and Robotic Systems
- McGill University, Start-up Funds \$80,000 CAD, 2011

The University of Michigan

- NSF EAGER \$100,002 USD (\$131,647.63 CAD), 2015-2017
DG-SLAM: Differential Geometric Simultaneous Localization and Mapping
- NASA AERO Institute \$79,000.00 USD (\$102,700 CAD), 2016
Constrained Peak-Seeking Control via Constrained Kalman Filtering
- **NASA Early Career Faculty Award** \$599,146 USD (\$788,746 CAD), 2015-2018
Dynamics and Control of Tensegrity Space Manipulators
- NASA STTR grant with Systems Technology Inc. (STI) (co-PI) \$55,000 USD (\$72,405 CAD), 2015-2016
Gust Load Estimation and Rejection with Application to Robust Flight Control Design for HALE Aircraft
- NASA Jet Propulsion Lab grant \$15,000 USD (\$19,747 CAD), 2015
MuTip Pointing Control for Model-Free High-bandwidth Imaging Precision
- NASA Jet Propulsion Lab grant \$15,647 USD (\$20,599 CAD), 2015
Dynamic Modelling of Cubesats for Mission Feasibility Simulator
- NASA Langley Research Center grant (PI with two other co-PIs) \$62,858 USD (\$82,748 CAD), 2013-2015
Heliogyro Blade High-altitude Environment Characterization at the University of Michigan
- University of Michigan, Start-up Funds \$565,000 USD, 2013

Professional Activities and Affiliations

Journal Editorial Boards

September 1, 2024	Senior Editor International Journal of Robotics Research
February 23, 2023 - August 31, 2024	Associate Editor International Journal of Robotics Research

Conference Editorial Boards and Program Committees

2022 - 2025	IEEE Robotics and Automation Society Editorial Board Associate Editor for IROS (area of Mechanisms, Design and Control)
-------------	--

2013 - Present	IEEE Control Systems Society Conference Editorial Board Associate Editor for ACC and CDC
2024 - 2025	Program Committee for ACC 2025
2017 - 2018	Program Committee of the 15th Conference on Computer and Robot Vision (CRV), Toronto, Canada, May 9-11, 2018
2011 - 2012	Technical Program Committee 7th Annual CIGRE Conference on Power Systems Conference Montreal, QC September 24 - 26, 2012.

Technical Committees and Society Membership

2024 - Present	IEEE Technical Committee on Robust and Complex Systems
2013 - Present	IEEE Technical Committee on Aerospace Controls
2012 - Present	IEEE Robotics and Automation Society
2011 - Present	IEEE Control Systems Society
2014 - 2020	Aerospace Control and Guidance Systems Committee (ACGSC) ACGSC representative to the IEEE

Conference Sessions Chaired

July 8-10, 2025	American Control Conference Sessions: Control Interpretations of Optimization Algorithms
May 19 - 23, 2025	International Conference on Robotics and Automation Session: Sensor Fusion 1
August 21-23, 2024	Conference on Control Technology and Applications Session: Nonlinear Systems
May 13-17, 2024	International Conference on Robotics and Automation Session: Sensor Fusion II
May 29 - June 2, 2023	International Conference on Robotics and Automation Session: Marine and Field Robotics
May 16-18, 2022	Optimization Days Session: Robotics
May 30 - June 5, 2021	International Conference on Robotics and Automation Session: Multiple and Distributed Systems VIII
August 24-26, 2020	Control Theory and Applications Session: Aerospace Applications
August 21-24, 2018	Control Theory and Applications Session: Linear Systems
June 27-29, 2018	American Control Conference Sessions: Optimal Control II, Optimal Control V
May 24-26, 2017	American Control Conference Sessions: Linear Systems I, Optimal Control II, Vision-based Navigation and Perception for Space Systems
July 6-8, 2016	American Control Conference Session: Robust Control I

May 30 - June 2, 2016	4th Joint International Conference on Multibody System Dynamics (IMSB) Session: MOD1 - Modelling, Formalism and Theoretical Methods
July 1-3, 2015	American Control Conference Session: Control Applications II
August 19-22, 2013	AIAA Guidance Navigation and Control Conference Session: Flexible and Articulated Spacecraft Dynamics and Control
June 17-19, 2013	American Control Conference Session: Stability of Nonlinear Systems IV
August 13-16, 2012	AIAA Guidance Navigation and Control Conference Session: Robotic Systems in Aerospace
June 30 - July 2, 2010	American Control Conference Session: Linear Systems 2

Conference, Workshops, and Special Sessions Organized and Co-organized

August 11-15, 2025	2025 Montreal Robotics Summer School Expert speaker on “State Estimation for Robotics”
July 8-10, 2025	American Control Conference Special Session, Special Session Co-organizer Session Title: <i>Control Interpretations of Optimization Algorithms</i>
June 21-25, 2025	RSS Workshop on Equivariant Systems Panelist
June 12-13, 2025	2025 ADVENTOR Training Week Leader of <i>Planning, Navigation, and Mapping</i> training module. Member of <i>Machine Learning and Control</i> module. Lecture on “State Estimation for Robotics”
February 12 - May 7, 2025	NASA / GNC TDT Robust Control Analysis and Design Course Presented in collaboration with Peter Seiler, Julian Theis, James Forbes
May 7-9, 2025	Meeting on System and Control Theory, Conference Co-organizer Primary local organizer
July 10-12, 2024	American Control Conference Special Session, Special Session Co-organizer Session Title: <i>Recent Systems and Control Research in Canada</i>
June 11-14, 2024	2024 Montreal Robotics Summer School Expert speaker on “State Estimation for Robotics”
May 3-5, 2023	Meeting on System and Control Theory, Conference Co-organizer
August 22-25, 2022	2022 Montreal Robotics Summer School Expert speaker on “State Estimation for Robotics”
May 16, 2022	2022 ELATE Teaching and Learning Conference Host of “Flipped Tutorial” breakout session
April 27-29, 2020	Meeting on System and Control Theory, Conference Co-organizer Note: this event was ultimately cancelled due to the 2020 COVID-19 pandemic.
June 4-6, 2014	American Control Conference Special Session, Special Session Co-organizer Session Title: <i>SO(3)-Based Attitude Control and Estimation</i>
March 13-16, 2012	Bellairs Workshop on Computer Animation, Workshop Co-organizer Session Title: <i>Pseudospectral Optimal Control for Character Animation</i>

Reviews

Many reviews have been completed for the following funding organizations, journals, and conferences. The year, and the number of reviews completed in that year, is indicated in parenthesis in the form “20XX-Y” where “20XX” indicates the year and “Y” indicates the number of reviews in that year.

Reviews for Funding Organizations

NSERC Discovery Grant Program (2013-2, 2017-1, 2019-1)
NSERC Alliance Program (2022-2)
Dutch Research Council (NWO), Domain Applied and Engineering Sciences (AES) (2023-1)
National Geographic (2017-1)
New Frontiers in Research Fund (2022-1)
IVADO (2017-1)
Mitacs (2017-1, 2019-1, 2020-1, 2023-1, 2026-1)
Canadian Foundation for Innovation (2016-1, 2026-1)
NASA Missouri Space Grant/EPSCoR (2014-1)

Journal Paper Reviews

Acta Astronautica (2012-2, 2020-1)
Aerospace Systems (2024-1)
AIAA Journal (2015-1)
AIAA Journal of Guidance, Control, and Dynamics (2010-2, 2011-1, 2014-5, 2015-2, 2016-1, 2017-6, 2018-3, 2021-3, 2022-1, 2023-2, 2024-2). Recognized as an “**excellent reviewer**” in 2013, 2014, 2015, 2016, 2017, and 2021.
AIAA Journal of Spacecraft and Rockets (2013-1, 2014-1, 2017-1)
AIAA Journal of Aerospace Information Systems (2017-1, 2018-1)
American Mathematical Monthly (2016-2)
Annual Reviews in Control, Robotics, and Autonomous Systems (2020-1)
ASME Journal of Computational and Nonlinear Dynamics (2011-1, 2012-1, 2016-3, 2023-1)
ASME Journal of Dynamics, Measurement, and Control (2015-1, 2017-1, 2023-1)
Journal of Field Robotics (2014-2, 2019-1)
Journal of Control Science and Engineering (2017-1)
Journal of Multibody System Dynamics (2022-1)
Automatica (2013-1, 2016-2, 2017-1, 2022-1, 2024-2)
Chinese Journal of Aeronautics (2013-1)
European Journal of Control (2013-1)
Hypothesis (2009-1, 2010-1)
IEEE Transactions on Automatic Control (2014-1, 2016-2, 2017-3, 2018-1, 2021-1, 2022-4, 2023-1, 2025-1)
IEEE Control Systems Letters (2017-2, 2018-1, 2020-1, 2022-4, 2024-1, 2026-1)
IEEE Transactions on Aerospace and Electronic Systems (2012-1, 2013-1, 2016-1, 2017-1, 2021-1, 2024-2, 2026-2)
IEEE Transactions on Control Systems Technology (2014-1, 2015-1, 2016-1, 2019-1, 2020-1, 2021-2, 2022-1, 2023-1, 2024-1, 2026-1)
IEEE Transactions on Control of Network Systems (2019-1)
IEEE Transactions on Circuits and Systems (2011-1)
IEEE Transactions on Field Robotics (2026-1)

IEEE Transactions on Robotics (2014-1, 2015-2, 2016-2, 2019-1, 2020-1, 2021-1, 2023-1, 2024-2)
 IEEE Robotics and Automation Letters (2017-1, 2019-1, 2020-1, 2021-2, 2022-3, 2023-2, 2024-1, 2026-1)
 IEEE Transactions on Industrial Electronics (2021-1)
 IEEE Control Systems Magazine (2010-2, 2023-1)
 International Journal of Robust and Nonlinear Control (2012-1, 2013-1)
 International Journal of Control (2012-1, 2021-1, 2022-1)
 International Journal of Aerospace Engineering (2014-1)
 International Journal of Robotics Research (2016-1, 2026-1)
 Journal of the Franklin Institute (2015-1, 2016-1)
 Journal of Small Satellites (2012-1)
 Optimization and Engineering (2016-1)
 Mechanism and Machine Theory (2012-1)
 Mathematics of Control, Signals, and Systems (2012-1)
 Proc. Institution of Mechanical Engineers, Part G: Journal of Aerospace Engineering (2014-1, 2015-1)
 Royal Aeronautical Society (2014-1)
 Systems and Control Letters (2018-1)
 The Aeronautical Journal (2014-1)
 Transactions of the Institute of Measurement and Control (2012-2)
 Transactions of the Canadian Society for Mechanical Engineering (2012-1, 2014-1, 2016-1)

Conference Paper Reviews

AIAA SciTech (2015-2, 2018-2)
 AIAA Guidance, Navigation, and Control Conference (2009-1, 2010-1, 2011-3, 2013-3)
 APCA International Conference on Automatic Control and Soft Computing (2022-1)
 CCToMM Symposium on Mechanisms, Machines, and Mechatronics (2013-2)
 European Control Conference (ECC) (2025-1)
 Geometric Science of Information (2017-2)
 IEEE Canadian Conference on Electrical & Computer Engineering (2012-4)
 IEEE Conference on Robotics and Automation (ICRA) (2010-1, 2011-2, 2014-1, 2016-1, 2019-2, 2022-2, 2023-1, 2024-4, 2025-3)
 IEEE Conference on Intelligent Robots and Systems (IROS) (2011-1, 2012-1, 2014-2, 2015-1, 2016-1, 2017-1, 2022-1, 2023-1, 2024-3, 2026-1)
 IEEE American Control Conference (ACC) (2010-1, 2011-1, 2013-1, 2014-1, 2016-2, 2017-4, 2019-1, 2021-5, 2022-3, 2023-1, 2024-4, 2025-2)
 IEEE Conference on Decision and Control (CDC) (2010-1, 2012-1, 2013-2, 2014-3, 2017-4, 2018-1, 2021-2, 2022-4, 2023-2, 2024-5, 2026-3)
 IEEE Conference on Control Technology and Applications (CCTA) (2017-2, 2018-1, 2024-1)
 IEEE Multi-Conference on Systems and Control (MSC) (2013-1)
 IFAC World Congress (2011-1, 2013-1, 2023-2)
 IFAC Mathematical Theory of Networks and Systems (2024-1)
 IFAC Symposium on Nonlinear Control Systems (2016-1)
 IFAC Symposium on Automatic Control in Aerospace (2016-4)
 International Conference on Space Robotics (iSpaRo) (2026-1)
 Robotics: Systems and Science (2023-4, 2025-3, 2026-4).
 SIGGRAPH Asia (2023-1).

Book Reviews for Publishers

Book review (2013-1, 2019-2, 2022-2) for Cambridge University Press.

Book review (2014-1) for Wiley.

Archival Book Reviews

J. R. Forbes, “Review of ‘ L_2 -Gain and Passivity Techniques in Nonlinear Control’ by A. van der Schaft”, *IEEE Control Systems Magazine*, vol. 37, no. 6, December 2017.

J. R. Forbes, “Review of ‘Fundamentals of Spacecraft Attitude Determination and Control’ by F. Landis Markley and John L. Crassidis”, *IEEE Control Systems Magazine*, vol. 36, no. 4, August 2015.

Administrative University Activities

McGill University

Committee Memberships within the Dept. of Mechanical Engineering, McGill University

March 26, 2024 - June 30, 2024 & March 25, 2020 - July 31, 2021	Member of Search Committee for Mech. Engineering Chair
September 1, 2021 - Present	Department Academic Committee
September 1, 2021 - Present	Tenure and Promotion Committee
September 1, 2021 - Present	U3/U4, U0/U1, U2, Academic Advisor
September 1, 2020 - Present	Chair of Curriculum Review Committee
September 1, 2017 - August 31, 2020	Member of Curriculum Review Committee
September 1, 2018 - April 30, 2019	Mechanical Engineering Search Committee
August 1, 2015 - August 31, 2018	Graduate Admissions and Scholarships Committee
May 16, 2011 - August 31, 2013	Systems, Measurement, and Controls Committee
September 1, 2016 - Present, & January 1, 2012 - August 31, 2013	Undergraduate Teaching Labs Committee
August 1, 2015 - August 31, 2017, & September 1, 2012 - August 31, 2013	Mechanical Engineering Colloquium organizer
September 1, 2012 - August 31, 2013	MECH 609 - Seminar organizer

Additional Service within the Dept. of Mechanical Engineering, McGill University

September 1, 2015 - August 31, 2016	Spearheaded “midterm teaching evaluation” program with Teaching and Learning Services.
January 1, 2016 - August 31, 2016	Spearheaded the Mechanical Engineering Undergraduate Exit Survey.
August 1, 2015 - August 31, 2016	Spearheaded the creation of the <code>matlab</code> Manual for Undergraduate Students.

Committee Memberships within the Faculty of Engineering, McGill University

April 25, 2025 - Present	Student Standing and Awards Committee
October 9, 2024 - Present	Mathematics Course Review Committee

September 12, 2024 - Present, & 2016 - 2018	Committee on Teaching and Learning
November 10, 2023 - Present	Graduate Engineering Equity Committee (GEEC) Faculty Advisor
April 2024	Faculty-level committee for ranking of William Dawson Scholar and James McGill Professor Applications.
March 2018 - May 2018	Search Committee for the Chair of the Department of Electrical and Computer Engineering
2016 - 2018	“Leadership Centre” Development Committee
August 1, 2015 - Present, & September 1, 2012 - August 31, 2013	MIAE Steering Committee
September 1, 2012 - August 31, 2013	MIAE Undergraduate and Graduate Curriculum Committee
August 1, 2015 - Present, & May 16, 2011 - August 31, 2013	McGill Institute for Aerospace Engineering (MIAE)

Other Service Items at McGill University and the Larger Academic Community

2025	College of Graduate Mentorship
2024	As a “leading researcher in robotics” I completed a survey “what is a robot”.
2022	Reviewer of 6 dossiers submitted for the GERAD Ph.D. Thesis Excellence Award
2021	Reviewer of 3 dossiers submitted for the RSS Pioneers Workshop
2021	Reviewer of 6 dossiers submitted for the CAGS Award for Outstanding Graduate Mentorship
2021	Reviewer of 9 dossiers submitted for the Carrie M. Derick Award for Graduate Supervision and Teaching
September 1, 2016 - August 31, 2018	Faculty advisor for the McGill Space Group (MSG)
September 1, 2016 - August 1, 2017	Interim faculty advisor for McGill Robotics
March 26, 2017	Robohacks Judge
August 29, 2016	Speaker at “How to be successful in your NSERC fellowship application workshop”, SKILLSETS, Teaching and Learning Services
August 31, 2015	

Other Committees

2018 - Present	Vanier Science Advisory Committee
----------------	-----------------------------------

University of Michigan

Committee Memberships within the Dept. of Aerospace Engineering, University of Michigan

September 1, 2013 - July 31, 2015	Flight Dynamics and Control Curriculum Committee
-----------------------------------	--

Committee Memberships within the College of Engineering, University of Michigan

September 1, 2013 - July 31, 2015	Robotics Doctoral Curriculum Committee
April 9, 2015	Michigan Robotics Day 2015 (co-organizer)
April 10, 2014	Michigan Robotics Day 2014 (co-organizer)
	Host for speaker, Dr. Peter Wurman, Kiva Systems

Other Service Items at the University of Michigan

November 15, 2013	Engineering Graduate Symposium Poster Session (judge)
-------------------	---

University of Toronto

Committee Assignments and Memberships at the University of Toronto

2011	UTIAS Director Search Advisory Board Faculty of Applied Science and Engineering
2009 - 2011	Graduate Education and Research Committee University of Toronto
2009 - 2011	UTIAS Student Experience Committee
April 2008	Space Systems Design Contest (judge) Faculty of Applied Science and Engineering

Student Supervision, Mentoring, and Guidance

Co-supervisors are indicated in parentheses. The title of the thesis or project is given in *italics*.

McGill University

Postdoctoral Fellows and Research Associates Supervised at McGill University

1. Mr. Thomas Hitchcox, *Sensor Calibration and Uncertainty Characterization*, September 2023 - June 2024.
Current position: Sonardyne Research Scientist - Navigation & Mapping.
2. Mr. Angad Bajwa, *Deep Inertial-Only Velocity Aided Estimation for Quadrotors*, September 2022 - August 2023.
Current position: BAsC Student at the University of Waterloo.
3. Ms. Robyn Fortune, *Enhanced System Identification and Control of Large Scale Test Rigs*, May 2020 - October 2020.
Current position: Engineer at CMLabs.
4. Mr. Alex Walsh, *Underwater SLAM Navigation*, May 2018 - April 2019.
Current position: Guidance, navigation, and control engineering at Opener.
5. Ms. Eleonora Botta, *Enhancing the Capabilities of Space Situational Awareness*, January - April, 2018. September - December, 2018.
Current position: Assistant Professor, Department of Mechanical and Aerospace Engineering, The University at Buffalo.

Doctoral Students Supervised at McGill University

1. Ms. Desiree Fisker, *Multi-vehicle Teach and Repeat*, September 2025 - Present.
2. Mr. Jonathan Eid, *Robust Control of Power Systems*, September 2023 - Present.
Direct transfer from MSc.
3. Ms. Yanting Zhou (J. Koveces), *Simulation of Contact*, September 2023 - Present.
Recipient McGill Engineering Doctoral Award (MEDA). Direct transfer from MSc.
4. Mr. Arturo Del Castillo Bernal, *Underwater Navigation using Forward-looking Sonar, Cameras, and DVL-INS*, September 2023 - Present.
Recipient McGill Engineering Doctoral Award (MEDA).
5. Mr. Vassili Korotkine, *Hessian Modifications in Nonlinear Least Squares*, September 2022 - Present.
Recipient McGill Engineering Doctoral Award (MEDA).
6. Mr. Kyungmin Jung, *Outliner Rejection in Underwater SLAM*, September 2021 - Present.
Recipient McGill Engineering Doctoral Award (MEDA).
7. Mr. Zi Cong Guo (T. Barfoot), *Navigation Using the Koopman Operator*, September 2021 - Present.
Note: Mr. Guo is a PhD student at the University of Toronto that I unofficially co-advise with Prof. T. Barfoot.
8. Mr. Mitchell Cohen, *SLAM With Quadric Features*, September 2020 - Present.
Recipient of a Vadasz Scholar McGill Engineering Doctoral Award (MEDA).
9. Mr. Steven Dahdah, *Linear Systems Theory and the Koopman Operator: Incorporating System Properties into Machine Learning for Dynamical Systems*, January 2020 - December 2024.
Direct transfer from MEng (thesis).
10. Mr. Mohammed Shalaby (J. Le Ny), *Ultra-Wideband for Robot Navigation: Calibration, Communication, and State Estimation*, January 2021 - December 2023.
Recipient of a McGill Engineering Doctoral Award (MEDA). Direct transfer from MEng (thesis).
Current position: Robotics Engineer, Provectus Robotics Solutions.
11. Mr. Jonathan Arsenault, *Quantitative Analysis of Hockey Using Spatiotemporal Tracking Data*, January 2020 - December 2023.
Recipient of a McGill Engineering Doctoral Award (MEDA).
Current position: Data scientist, Carolina Hurricanes Hockey Club.
12. Mr. Thomas Hitchcox, *Strategies for Subsea Navigation and Mapping Using an Underwater Laser Scanner*, January 2019 - August 2023
Recipient of a McGill Engineering Doctoral Award (MEDA).
Current position: Sonardyne Research Scientist - Navigation & Mapping.
13. Mr. Charles Cossette (D. Saussié), *On-Manifold Estimation Methods for Multi-Robot Relative Localization using Ultra-Wideband Radio*, January 2019 - August 2023.
Current position: Software engineer, Collision Avoidance Team, Zoox.
14. Ms. Qi Sun (J. Angeles), *Cartesian Elastodynamics Modelling of Parallel-kinematics Machines Under High-frequency, Small-amplitude Manoeuvres*, September 2016 - August 2023
Recipient of a McGill Engineering Doctoral Award (MEDA).
Current position: Associate Professor, College of Intelligent Systems Science and Engineering, Harbin Engineering University.
15. Mr. Daryoush Mirza Hekmati (W. Heath), *Control of Air-flow in Reciprocating Internal Combustion Engines*, University of Manchester, January 2015 - March 2019.
Note: Mr. Hekmati was a PhD student at the University of Manchester that I unofficially co-supervise with Prof. W. Heath.

Current position: Senior Control Engineer at MDA Space, Spacecraft GNC system.

16. Mr. Stephen Alexander Chee, *Norm-Constrained State Estimation Strategies*, January 2013 - February 2018

Recipient of a McGill Engineering Doctoral Award (MEDA).

Current position: Mission Systems Engineering division of MDA Corporation.

17. Ms. Xiaowei Shan (J. Angeles), *Design, Prototyping and Testing of Biaxial MEMS Accelerometers for Rigid-body Pose-and-twist Estimation*, September 2012 - May 2017.

Recipient of a McGill Engineering Doctoral Award (MEDA).

Current position: Assistant Professor, School of Mechanical-Electronic and Vehicle Engineering, Beijing University of Civil Engineering and Architecture,.

18. Ms. Leila Bridgeman, *Methods Exploiting and Extending the Conic Sector Theorem*, January 2012 - October 2016.

Recipient of a McGill Engineering Doctoral Award (MEDA).

Current position: Assistant Professor, Dept. of Mechanical Engineering and Materials Science, Duke University.

Master of Science (Thesis) Students Supervised at McGill University

1. Ms. Cayleigh Bates (J. Marshall), *Autonomous Mine Cleanup*, September 2026 - Present.
2. Mr. Charles Morain, *Multi-Robot Navigation*, September 2026 - Present.
3. Mr. Francis Maziade, *Passivity-Based Design of PHIL Interfaces*, September 2026 - Present.
4. Mr. Pierre Chamoun, *Multi-Sensor Calibration*, January 2026 - Present.
5. Mr. Mohammad Ghali (J. Bergthorson), *Control of Metal-Burning Fuel*, September 2025 - Present.
6. Ms. Isabel Loughheed, *Underwater Navigation*, September 2025 - Present.
7. Mr. Louis-Thomas Roy, *Off-Road Navigation*, September 2025 - Present.
8. Mr. Junha Yoo (D. Nwrouzezahrai), *Continuous-time State Estimation in Underwater Environments*, September 2024 - Present.
9. Mr. Andrew Stirling, *Machine Learning Approaches to UWB Noise Characterization*, September 2024 - Present.
10. Mr. Kyle Biron-Gricken, *Robust State Estimation using UWB*, September 2024 - Present.
11. Mr. Timothy Adams, *Robust Optimization Through the Lens of Control*, September 2024 - Present.
12. Mr. Nicholas Dahdah (J. Le Ny), *Multi-agent UWB Navigation*, January 2024 - Present.
13. Ms. Ashley Meagher, *Robust Control of Green Energy Systems*, September 2023 - Present.
14. Mr. Samuel Smocot (A. Sedal), *Observability Informed Optimal Sensor Placement for Soft Robots*, September 2023 - December 2025.
15. Mr. Sepehr Moalemi, *Input-Output Stability of First-Order Optimization Algorithms: A Passivity-Based Gain-Scheduling Approach*, September 2022 - December 2025.
16. Mr. Antoine Henri, *Construction and System Identification of a Hybrid Actuator*, September 2022 - August 2024.
Current position: Control systems engineer, Kinova.
17. Mr. Louis Lortie, *Forward-backward Extended DMD with an Asymptotic Stability Constraint*, September 2022 - August 2024.
Current position: PhD Student, McGill University.
18. Mr. Syed Shabbir Ahmed, *Range-aided Relative Pose Estimation and Formation Planning for Multi-robot Systems*, September 2022 - August 2024.

Winner of the 2025 Canadian Society for Mechanical Engineering Gold Medal for “Outstanding Academic Achievement in Mechanical Engineering.”

Current position: GNSS Algorithm Designer at Novatel Inc. - Hexagon Autonomy and Positioning

19. Mr. Philippe Decoste, *A Direct Photometric Approach to Homography Filtering using Thermal Imagery*, September 2021 - August 2024.
20. Mr. Arturo Del Castillo Bernal, *Bayesian Filtering for Homography Estimation*, September 2021 - August 2023.
Current position: PhD Student, McGill University.
Winner of the Michael P. Paidoussis Prize for the academic year 2022-2023.
21. Ms. Harriet Violet Chorney (M. Driscoll), *System Identification of Biological Tissue to Improve Haptic Interaction*, September 2022 - December 2023.
Current position: Autonomy Developer, OTTO Motors by Rockwell Automation.
22. Ms. Natalia Pavlasek, *Simultaneous Localization and Mapping using Magnetic Fields and their Gradients*, January 2021 - August 2022.
Current position: PhD Student, University of Washington.
23. Mr. Faraaz Ahmed, *Guidance and Model Predictive Control of a Tandem-rotor Helicopter*, September 2020 - August 2022.
Current position: Quantitative Analysts, Financial Engineering & Modelling, Deloitte.
24. Mr. Vassili Korotkine, *State Estimation on Matrix Lie Groups using Iterative Filters*, September 2020 - August 2022.
Current position: PhD Student, McGill University.
25. Mr. Daniil Lisus, *Dissecting Visual-Inertial SLAM: Errors, Landmarks, and Consistency*, September 2020 - August 2022.
Current position: PhD Student, University of Toronto.
26. Mr. Kyungmin Jung, *Sliding-Window-Based Tightly-Coupled LIDAR-Inertial-Visual Odometry and Mapping*, September 2019 - December 2021.
Current position: PhD Student, McGill University.
27. Mr. Amro Al-Baali, *Combining DVL-INS and Laser-based Loop Closures in a Batch Estimation Framework for Underwater Positioning*, September 2019 - December 2021.
2020 - 2021 Best Seminar Award
Current position: PhD Student, McGill University.
28. Mr. Marc-Antoin Lavoie, *Map-Constrained Train Navigation with IMU Measurements*, January 2019 - December 2021.
Current position: PhD Candidate, University of Toronto.
29. Ms. Amanda Bianco (A.-M. Lauzon), *Automating Force Clamps to Measure Muscle Mechanics in Tissue Culture*, September 2018 - December 2020.
Current position: Medical student, Montreal, QC.
30. Mr. Kevin Bergamin, *High-Performance Data-Driven Control of Physically-Based Human Characters*, September 2018 - August 2020. Current position: Graphics and Animation Specialist at Ubisoft
31. Mr. Mitchell Cohen, *Wind-Field Mapping Using a Coupled State and Wind-Velocity Estimator for Fixed-Wing Unmanned Aerial Vehicles*, September 2018 - August 2020.
Current position: PhD student, McGill University.
32. Ms. Robyn Fortune, *Modern Control Approaches to Large-Scale Testing of Aerospace Structures*, January 2018 - December 2019.
Current position: Engineer at CMLabs.

33. Mr. Ken Lee, *Negative Imaginary Controller Synthesis: $\mathcal{H}_2$ and $\mathcal{H}_\infty$ Approaches*, September 2017 - August 2019.
Current position: Software engineer at Sanctuary AI.
34. Mr. Jonathan Arsenault, *Practical Considerations and Extensions of the Invariant Extended Kalman Filtering Framework*, September 2017 - August 2019.
Current position: Data scientist, Carolina Hurricanes Hockey Club.
35. Mr. Zuyu Yin (J. Angeles), *Control of Fast Pick-and-Place Robots*, September 2016 - August 2018.
Recipient of a McGill Engineering Doctoral Award (MEDA) and a Chinese Scholarship Council (CSC) award.
Current position: Staff Engineer at CM Labs, Montreal, QC.
36. Mr. Duowen Qian, *Relative Feature Measurement Simultaneous Localization and Mapping in Three Dimensions*, September 2016 - December 2018. Current position: SLAM Expert at ARA Robotique, Montreal, QC.
37. Mr. Harsh Godbole, *Dynamic Modelling and Control of Cable-Actuated Systems*, April 2016 - October 2017.
Current position: Aircraft Systems Software Specialist: Flight Controls, CAE, Montreal, QC.
38. Mr. Francois Hogan, *Dynamic Modelling and Control of Martian Tumbleweed Rovers*, September 2013 - February 2016.
Current position: Facebook AI research.
39. Ms. Donya Mohammadshahi (M. Nahon), *The Dynamics and Control of Cable-Actuated Systems*, September 2011 - June 2013.
Current position: MAYA HTT, Montreal, QC

Master of Engineering (Non-Thesis) Students Supervised at McGill University

1. Mr. Matteo Hapiot, *Active Roll Control of an MRT Rocket*, April 2025 - December 2025.
2. Mr. Charles Cossette, *Adaptive Notch Filtering to Improve Attitude Estimation of UAVs*, April 2017 - April 2018.
3. Mr. Muniir Rohimun, *Passivity-Based Observer Design for Flexible Joint Manipulator Control*, September 2011 - August 2013.

Baccalaureate Students Supervised at McGill University

MECH 403/404 Honours Thesis

1. Yorgo Abou Haidar (A. Higgins), *Attitude Control of a Balloon-Borne Payload*, January 2026 - December 2026.
2. Alexandre Hadji-Thomas, *Variational Inference for Robot Navigation*, January 2025 - December 2025.
3. Mr. Mikhail Kudryavtsev (M. Nahon), *Modelling and Stability Analysis of a Towed Echosounder*, January 2025 - December 2025.
4. Mr. Junha Yoo, *Coupled LiDAR-Visual-Inertial SLAM*, September 2023 - April 2024.
5. Mr. Kyle Biron-Gricken, *Anti-windup Control of UAVs*, September 2023 - April 2024.
6. Mr. Aldo Abou Chedid, *Magnetic Field Mapping Using Gaussian Process Regression*, January 2021 - December 2021.
7. Mr. Orlando Nicoletti, *Delayed-State Invariant Extended Kalman Filter for Monocular Visual-Inertial Navigation*, January 2019 - December 2019.

8. Mr. Amro Al-Baali, *Gain-Scheduling Conic-Sector-Based Tracking Control*, September 2017 - April 2018.
9. Mr. Sandro Papais, *Gravimeter-Enabled Interplanetary Navigation*, September 2017 - April 2018.
10. Mr. Dylan Caverly, *Gain-Scheduling Passivity-Based Tracking Control*, January 2016 - December 2016.
11. Mr. Alex Walsh, *Dynamic Modelling and Control of Flexible Robotic Space Manipulators with Telescoping Booms*, January 2012 - December 2012. **Best honours thesis winner.**
12. Mr. David Zlotnik, *A Comparison of Attitude Parameterizations for Spacecraft Attitude Control*, January 2012 - December 2012.
13. Mr. Francois Hogan, *Spacecraft Fuel Slosh: Modelling and Control*, January 2012 - December 2012.
14. Mr. E. Roger Fernando, *Dynamic Modelling and Control of Telescoping Manipulators with Lumped-Mass Flexibility*, September 2011 - April 2012.

MECH 498 Interdisciplinary Design Project 1

1. Mr. Laurence Liang, *Machine Learning Classification of Channel Impulse Responses in UWB*, September 2024 - March 2025
2. Mr. Luis Sanchez, *Design of a Control Lab for MECH 412*, September 2022 - December 2022.
3. Mr. Samuel Herschmann, *Modelling and Control of Gyroelastic Systems*, January 2019 - April 2019.
4. Mr. Todd Scrimgeour, *Control Systems Design for Robotic Manipulator*, September 2017 - December 2017.

ECSE 478 Honours Thesis

1. Irene Simier Requejo, *Radar Odometry*, September 2025 - April 2026.
2. Mr. Nicholas Dahdah, *Differentiable Filtering for Robot Navigation*, January 2023 - December 2023.
3. Mr. Titouan Delorme (Prof. Peter Caines), *Dynamic Power Cap and Regenerative Braking Control in a Formula Style Electric Racing Car*, September 2020 - April 2021.
4. Ms. Catherine Vanasse-Grosdidier, *Optimal Parallel Feedforward Control*, September 2018 - April 2019.
5. Mr. Sean Wolfe (Prof. Michael Rabbat), *UAV Target Tracking for AUVSI-SUAS Competition*, September 2016 - December 2016.

MECH 494 Honours Design Project

1. Mr. Julien Otis-Laperrière, *Tandem-rotor Vehicle Design, Build, Fly*, September 2021 - December 2021.
2. Mr. Sandro Papais, *Control of Oxidizer Flow for the McGill Rocket Team Propulsion Systems*, September 2017 - April 2018.
3. Mr. Dylan Caverly, *Parallel Robot Manipulator Design*, January 2017 - April 2017.
4. Mr. Alex Walsh, *McHAB Descent Control*, January 2013 - April 2013.
5. Mr. David Zlotnik, *McHAB Attitude Control Hardware Design, Construction, and Testing*, January 2013 - April 2013.
6. Mr. Dylan Jude, *Desaturation Hardware for McHAB*, September 2012 - December 2012.

Summer Students Supervised at McGill University

1. Mr. Didier Zhang, *AUV Thruster Design*, Design Team Internship, May - August 2026.
2. Ms. Natasha Lawford, *Subsea Vision Enhancement*, SURE, May - August 2026.
3. Ms. Cayleigh Bates (J. Marshall), *Autonomous Mine Cleanup*, SURE, May - August 2026.
4. Mr. Charles Morain, *Covariance Intersection Methods Applied to Multi-Robot Navigation*, SURE, May - August 2026.
5. Ms. Isabel Loughheed, *LBL SLAM when Heading is Known, Part 2*, SURE, May - August 2025.
6. Ms. Irene Simier Requejo, *Radar-IMU Odometry*, SURE, May - August 2025.
7. Mr. Mohammad Ghali (J. Bergthorson), *Control of Metal-Burning Fuel*, SURE, May - August 2025.
8. Mr. Angad Bajwa, *Benchmarking Feature Detection Underwater*, Summer Project, May - August 2025.
9. Ms. Isabel Loughheed, *LBL SLAM when Heading is Known, Part 1*, SURE, May - August 2024.
10. Mr. Junha Yoo, *Continuous-time State Estimation*, SURE, May - August 2024.
11. Mr. Andrew Stirling, *Machine Learning Approaches to UWB Noise Characterization*, SURE, May - August 2024.
12. Mr. Kyle Biron-Gricken, *Robust State Estimation using UWB*, SURE, May - August 2024.
13. Mr. Timothy Adams, *Robust-Performance Observer Design*, SURE, May - August 2024.
14. Mr. Jonathan Eid, *Implementing Antiwindup Compensation in Linear Control Systems*, SURE, May - August 2023.
15. Mr. Samuel Smocot (A. Sedal), *Controllability and Observability of Soft Robots*, SURE, May - August 2023.
16. Mr. Nicholas Dahdah, *Learning Noise Characteristics of Object Detections for Multi-Object Tracking*, SURE, May - August 2023.
17. Mr. Syed Shabbir Ahmed, *Formation and Attitude Control of Decentralized Multi-robot Systems*, SURE, May - August 2022.
18. Mr. Louis Lortie, *Koopman-based System ID*, May - August 2022.
19. Ms. Jiaying Fang, *Experimental Evaluation of Teach and Repeat with UWB*, May - August 2022.
20. Mr. Jasper Yun, *Benchmark Dataset Collection*, SURE, NSERC USRA recipient, May - August 2021.
21. Ms. Kattly Li, *Benchmark Dataset Collection*, SURE, May - August 2021.
22. Ms. Natalia Pavlasek, *An Invariant Extended Kalman Filter for Navigation using Two Position Receivers and an Inertial Measurement Unit*, SURE, NSERC USRA recipient, May - August 2020.
23. Mr. Daniil Lisus, *Learning Position and Orientation of a Robot Using Ultra-wideband Antenna Received Signal Strength*, SURE, NSERC USRA recipient, winner of the best SURE project, General and Multidisciplinary category, May - August 2020.
24. Mr. Niels van der Laan, *Invariant RTS Smoothing*, GERAD Sponsored Student, May - August 2019.
25. Mr. Orlando Nicoletti, *Monocular Visual-Inertial Navigation*, SURE, May - August 2019.
26. Mr. Kyungmin Jung, *Autonomous Navigation of Robotic Systems Using the Invariant Sliding Window Filter*, SURE, May - August 2019.
27. Mr. Amro Al-Baali, *Comparing Exteroceptive Sensors for Autonomous Underwater Vehicle Navigation*, SURE, May - August 2019.
28. Mr. Raphael Zonis (Dr. G. Ijpma and Prof. A.-M. Lauzon), *Modelling, System Identification, and Control of Active Viscoelastic Tissues*, SURE, May - August 2018.
29. Mr. Niels van der Laan, *Fatigue Structural Testing Enhancement Research (FASTER)*, SURE, May -

August 2018.

30. Mr. Mitchell Cohen, *Modelling and Control of a VTOL to Forward-flight UAV*, SURE, May - August 2018.
31. Mr. Martin Doff-Sotta, *Hardware in the Loop Testing for a VTOL to Forward-flight UAV*, May - August 2018.
32. Mr. Shatil Rahman, *Simultaneous Localization and Mapping as a Probabilistic Constrained Optimization Problem*, SURE, May - August 2018.
33. Mr. Rashik Habib, *Variance-Constrained Control using Gaussian Process Models*, SURE, May - August 2018.
34. Mr. Paul Albert-Lebrun, *High-altitude Balloon Communications*, MIAE-funded student project, May - August 2017.
35. Mr. Robin Aucoin, *LMI-Constrained Kalman Filtering*, SURE, NSERC USRA recipient, May - August 2017.
36. Mr. Jonathan Arsenault, *Autonomous Parafoil Navigation, Guidance, and Control*, SURE, NSERC USRA recipient, winner of the best SURE project, Aerospace Engineering category, May - August 2017.
37. Ms. Lindsey Grant, *Parafoil Modelling and Control*, May - August 2017.
38. Mr. Cornelius Hart, *Implementation of a Kalman Filter on a Google Tango Tablet*, SURE, MIAE co-funded, May - August 2016.
39. Mr. Anthony Maalouly, *Nyquist Interpretation of the Small Gain, Large Gain, and Passivity Theorems*, SURE, MIAE co-funded, May - August 2016.
40. Mr. Dylan Caverly, *Control of a Flexible-Link Manipulator with Zero Steady-State Tracking Error*, SURE, NSERC USRA recipient, MIAE co-funded, winner of the best SURE project, Aerospace Engineering category, May - August 2016.
41. Mr. David Zlotnik (C. A. Beltempo), *Control Systems Enhancement for Large Scale Testing* (Project with the National Research Council (NRC) of Canada), May - August 2013.
42. Mr. Paul Aubin, *McHAB Descent Control Design, Construction, and Test* (visiting student from Supaero, France), May - August 2013.
43. Mr. Nguyen Khoi Tran, *Attitude Control for a Stratospheric Balloon Platform*, SURE, MIAE co-funded, May - August 2013.
44. Mr. Ryan Caverly, *Dynamic Modelling and Passivity-Based Control of Cable-Actuated Systems* SURE, NSERC USRA recipient, May - August 2013.
45. Mr. Dylan Caverly, *Computer Aided Design of McHAB Payload and Cable-Robot Testbed*, May - August 2013.
46. Mr. Mohamed Najih, *Using an Observer to Synthesize Optimal Strictly Positive Real and Conic Controllers*, SURE, NSERC USRA recipient, May - August 2013.
47. Mr. Francois Hogan, *Dynamic Modelling and Stability Analysis of a Martian Tumbleweed Rover*, SURE, NSERC USRA recipient, MIAE co-funded, winner of the best SURE project, Aerospace Engineering category, May - August 2013.
48. Mr. David Zlotnik, *Flexible Spacecraft Modelling and Control*, SURE, NSERC USRA recipient, MIAE co-funded, May - August 2012.

Student Research Projects Supervised at McGill University

1. Mr. Tim Rietberg, *System Identification of a Metal Burning Process*, Visiting MSc Student from TU Eindhoven, September - December 2025.
2. Mr. Philip Becker, *Control of a Heat Pump and Water Heating System*, Independent Project, April - August 2025.
3. Mr. Dorian Bernard, *Control of an Autonomous Catamaran*, Capstone Design Project, January 2025-April 2025. (Mr. Bernard is an ECE student from Polytechnique Montréal.)
4. Mr. Alex Beaudin, *LiDAR-Camera-IMU Head Construction*, Independent Project, Sept. 2020 - April 2021.
5. Mr. Julien Otis-Laperriere, *Research and Experimental Testing of Liquid-Injection Thrust Vector Control Actuator (LITVC)*, Mitacs Accelerate, August 2019 - December 2019.
6. Mr. Sandro Papais, *Launch Vehicle Design and Trajectory Optimization Using Direct Collocation and Nonlinear Programming*, NSERC Engage, February - May, 2019.

Student Teams and Projects Supervised at McGill University

1. *Design of a Semi-Active Suspension System for an FSAE Electric Race Car* 2025 - 2026
Mechanical Engineering Capstone Project, MECH 463
Eric Masselot, Estelle Huy, Rocco Racioppo, Jonas Maarek
2. *Design of a Folding Arm Mechanism for a Drone* 2025 - 2026
Mechanical Engineering Capstone Project, MECH 463
Charles Morin, Karim Saliba, Fouad Al Laham, Salman Dajani
3. *Design of Liquid Cooling Controller for an FSAE Electric Race Car* 2024 - 2025
Mechanical Engineering Capstone Project, MECH 463 (co-advised with D. Caverly)
Philip Becker, Francois-Xavier Duclos, Shridhar Baichoo, Marina Pereira Garcia
4. *Design of a Towed Echosounder* 2024 - 2025
Mechanical Engineering Capstone Project, MECH 463 (co-advised with M. Nahon)
Mr. Karim Al Sabbagh, Mr. Frédéric Vallée, Mr. Nicolas Thirion, Mr. Auriano Julsain.
5. *Control System for McGill Formula Electric* (3rd place at Design Day) 2021 - 2022
Mechanical Engineering Capstone Project, MECH 463
Ms. Kattly Li, Mr. Philippe Voyer, Mr. Jeremy Rose, Mr. Louis Lortie
6. *Autonomous Train Testbed* 2020 - 2021
Mechanical Engineering Capstone Project, MECH 463
Ms. Carly Bennett, Mr. Christopher Chung, Ms. Emily Stotland, Mr. Daniel Schwartz
7. *Spinning LIDAR for UAV Navigation with ARA Robotique* (3rd place at Design Day) 2020 - 2021
Mechanical Engineering Capstone Project, MECH 463
Mr. Maksim Solovyev, Mr. Victor Rolland, Mr. Andrej Jermilov, Mr. Qitong Zhang
8. *Development of a Control System for a FSAE Electric Race Car* 2018 - 2019
Mechanical Engineering Capstone Project, MECH 463
Mr. Ali Al-taher, Mr. Sresht Annadevara, Mr. Félix Couturier-Lamy, Mr. John Jung
9. *Design of a Planar Parallel Robot for Inertia-Parameter Identification of a Rigid-Body* 2018 - 2019
Mechanical Engineering Capstone Project, MECH 463
Co-supervised with Prof. J. Angeles
Mr. Omar Mahmoud, Mr. Phillip Salamy, Mr. Mohammed Shalaby
10. *Unmanned Aerial Vehicle Deployment from a Tethered Balloon - Team 1* 2017 - 2018

- Mechanical Engineering Capstone Project, MECH 463
Ms. Jessica Ronci, Mr. Nicholas Giroux-Lacombe, Mr. Jean-Christophe Maranda, Mr. Benoit Labelle
11. *Unmanned Aerial Vehicle Deployment from a Tethered Balloon - Team 2* 2017 - 2018
Mechanical Engineering Capstone Project, MECH 463
Mr. Mitchell Cohen, Mr. Robert Joy, Ms. Catherine Koutsaris, Mr. Alessandro Defazio
 12. *Using Order to Reduce People-Elephant Conflict* 2017 - 2018
Mechanical Engineering Capstone Project, MECH 463
Mr. Ted Li, Ms. Yiru Wang, Mr. Ryan Dotsikas, Mr. Nick Brunt.
 13. *Hybrid Rocket Engine Development* 2017 - 2018
Mechanical Engineering Capstone Project, MECH 463
Mr. Jonathan Lesage, Mr. Austin L'Ecuyer, Mr. Kyle Weissman, Mr. Thomas Hannaford
 14. *Desktop Photogrammetry - A 3D Scanning Approach* 2017 - 2018
Electrical Engineering Capstone Project, ECSE 474/475
Mr. Thomas Faribault-Ménard, Mr. Gabriel Chootong, Mr. Nicholas Roy, Mr. Jeslan Rajendram
 15. *McGill Cubesat ACDS Design* 2017 - 2018
Electrical Engineering Capstone Project, ECSE 456
Mr. Roberto Casoli, Mr. Eric Haniak, Mr. Philippe Lessard
 16. *McGill Cubesat ACDS Design* 2016 - 2017
Mechanical Engineering Capstone Project, MECH 463
Mr. Talha Tariq, Mr. Xiaokang Deng, Mr. Calvin Liao, Mr. Charles Turner
 17. *The McGill High Altitude Balloon (McHAB) Project* 2012 - 2013
Electrical Engineering Capstone Project, ECSE 474/475
Mr. Nguyen Khoi Tran, Mr. Nam Nguyen, Mr. Long Ma, and Mr. Xiao He
 18. *2012 CANSAT McGill Team* 2011 - 2012
Mechanical Engineering Capstone Project, MECH 463
Ms. Laura Richardson, Mr. Marc Gaulier, Mr. Lucas Kruitwagen, Mr. Rory Ewing, Mr. Umaid Imran, and Mr. Nguyen Khoi Tran

University of Michigan

Doctoral Students Supervised at the University of Michigan

1. Mr. David Evan Zlotnik, *Lie Group Observer Design for Robotic Systems: Extensions, Synthesis, and Higher-Order Filtering*, University of Michigan, January 2014 - August 2018.
Current position: Autonomous vehicles engineer at Zoox.
2. Mr. Ryan James Caverly, *Optimal Output Modification and Robust Control using Minimum Gain and the Large Gain Theorem*, University of Michigan, January 2014 - March 2018.
Current position: Assistant Professor, Dept. of Aerospace Engineering and Mechanics, University of Minnesota.
3. Mr. Alex Walsh, *Extremum-Seeking Guidance and Conic-Sector-Based Control of Aerospace Systems*, University of Michigan, September 2013 - December 2017.
Current position: Guidance, navigation, and control engineering at Opener.

Master of Engineering (Non-Thesis) Students Supervised at the University of Michigan

1. Mr. Phillip Hargrove, *Flexible Spacecraft Modelling*, University of Michigan, September 2014 - December 2014.

2. Mr. Anand Swaminathan, *Modelling of a Spherical Rover*, University of Michigan, September 2013 - April 2014.
Current position: Control Systems Engineer, Tesla Motors, Palo Alto, CA.
3. Mr. Evan Hilgemann, *Pointing Control of Small Balloon Payloads*, University of Michigan, September 2013 - April 2014.
Current position: Engineer, Jet Propulsion Lab, Pasadena, CA.

Baccalaureate Students Supervised at the University of Michigan

AERO 390 Directed Study

1. Mr. Ryan Patterson, *Dynamic Modelling and Control of Thin Floating Plates*, January 2015 - April, 2015
2. Mr. Jin Woo Park, *Angular Acceleration and Velocity Estimation Using Accelerometer Strapdowns*, January 2015 - April, 2015
3. Mr. Roshan Radhakrishnan, *Balloon Gondola Control Systems Design and Hardware Implementation*, September 2014 - April 2015.

Summer Students

1. Mr. Ryan Patterson, *Robust Control of Thin Floating Plates*, May - August, 2015
2. Mr. Jin Woo Park, *Kalman Filtering of Measurements used in Accelerometer Strapdowns*, May - August, 2015
3. Mr. Dylan Caverly, *Attitude Estimation Hardware Construction*, July - August, 2014.
4. Mr. Andrew Taylor (Prof. J. Cutler), *Strato Estimator Design*, May - August, 2014.
5. Mr. Roshan Radhakrishnan (Prof. J. Cutler), *Strato Control Systems Design*, May - June, 2014.
6. Mr. David Carter (Prof. J. Cutler), *Strato Dynamics*, May - June, 2014.

Student Teams and Projects Supervised at the University of Michigan

1. *MiTEE - Miniature Tether Electrodynamics Experiment* (Prof. B. Gilchrist) 2014 - 2015
10 to 12 team members annually consisting of undergraduate, M.Eng., and Ph.D. students from UMich tasked with designing and prototype testing a femto- to nano-satellite size electrodynamic tether.
2. *Strato Balloon Team* (Prof. J. Cutler) 2013 - 2015
10 to 12 team members annually consisting of undergraduate, M.Eng., and Ph.D. students from UMich tasked with designing, building, testing, and launching a high-altitude balloon system.

Pro-dean at McGill University

1. Mr. Joey Litalien November 18, 2024
Dept. of Electrical and Computer Engineering
2. Ms. Kamila Mustafina June 16, 2023
Dept. of Chemistry
3. Ms. Gillian Klassen September 23, 2022
Dept. of Educational & Counselling Psychology
4. Mr. Shuang Gao November 2018
Dept. of Electrical and Computer Engineering

Doctoral Candidate Committees at McGill University

As a member of a doctoral committee at McGill University, thesis reading and evaluation is compulsory, as is attending the student's defense.

- | | |
|---|--|
| 1. Mr. Louis Lortie | April 2025 - Present |
| Dept. of Mechanical Engineering, McGill University | Supervisor: Prof. Guillaume Durandau |
| 2. Mr. Yuanyuan Tao | Feb. 2025 - Present |
| Dept. of Electrical and Computer Engineering, McGill University | Supervisor: Profs. Paul Kry and Derek Nowrouzezahrai |
| 3. Mr. Daniel Kong | Sept. 2023 - Present |
| Dept. of Electrical and Computer Engineering, McGill University | Supervisor: Profs. Paul Kry and Derek Nowrouzezahrai |
| 4. Mr. Wilfred Mason | Sept. 2022 - Present |
| Dept. of Mechanical Engineering, McGill University | Supervisor: Prof. Audrey Sedal |
| 5. Mr. Celia Hameury | Sept. 2022 - Present |
| Dept. of Mechanical Engineering, McGill University | Supervisor: Prof. Marco Amabili |
| 6. Mr. Yaojie Cai | Jan. 2021 - Present |
| Dept. of Electrical and Computer Engineering, McGill University | Supervisor: Prof. Xiaozhe Wang |
| 7. Mr. Xingshuai Huang | Jan. 2021 - Present |
| Dept. of Electrical and Computer Engineering, McGill University | Supervisor: Prof. Benoit Boulet |
| 8. Mr. Xu Dai | Sept. 2020 - Present |
| Dept. of Mechanical Engineering, McGill University | Supervisor: Prof. Jozsef Kovacs |
| 9. Mr. Ali Raoofian | Sept. 2019 - Present |
| Dept. of Mechanical Engineering, McGill University | Supervisor: Prof. Jozsef Kovacs |
| 10. Ms. Fares El Tin | Sept. 2019 - May 2022 |
| Dept. of Mechanical Engineering, McGill University | Supervisor: Prof. Meyer Nahon |
| 11. Ms. Juan Carlos Hernández Ramirez | Sept. 2019 - Present |
| Dept. of Mechanical Engineering, McGill University | Supervisor: Prof. Meyer Nahon |
| 12. Ms. Sally Zabetian-Hosseini | January 2020 - Present |
| Dept. of Electrical and Computer Engineering, McGill University | Supervisors: Profs. Benoit Boulet and Geza Joos |
| 13. Mr. Ehsan Dehghanpourl | January 2019 - Present |
| Dept. of Electrical and Computer Engineering, McGill University | Supervisor: Prof. Geza Joos |
| 14. Ms. Shrouti Dutta | September 2019 - Present |
| Dept. of Mechanical Engineering, McGill University | Supervisor: Prof. Arun Misra |
| 15. Mr. Hamed Layeghi | January 2017 - Present |
| Dept. of Electrical and Computer Engineering, McGill University | Supervisor: Prof. Peter Caines |
| 16. Mr. Syam Vangar | January 2017 - Present |
| Dept. of Mechanical Engineering, McGill University | Supervisor: Prof. Siva Nadarajah |
| 17. Mr. Qingfeng Lou | March 2017 - Present |
| Dept. of Mechanical Engineering, McGill University | Supervisor: Prof. Jozsef Kovacs |
| 18. Ms. Isabelle Jean | April 2016 - April 2019 |
| Dept. of Mechanical Engineering, McGill University | Supervisor: Prof. Arun Misra |
| 19. Mr. Majid Sheikholeslami | September 2011 - Present |
| Dept. of Mechanical Engineering, McGill University | Supervisor: Prof. Jozsef Kovacs |

20. Mr. Avishek Paul	January 2016 - August 2018
Dept. of Electrical and Computer Engineering, McGill University	Supervisor: Prof. Geza Joos
21. Mr. Albert Peiret Gimenez	January 2016 - August 2019
Dept. of Mechanical Engineering, McGill University	Supervisor: Prof. Jozsef Kovecses
22. Mr. Amir Hossein Rabbani	September 2011 - September 2016
School of Computer Science, McGill University	Supervisor: Prof. Paul Kry
23. Mr. Ali Pakniyat	September 2011 - September 2016
Dept. of Electrical and Computer Engineering, McGill University	Supervisor: Prof. Peter Caines
24. Mr. Farnood Gholami	September 2011 - May 2016
Dept. of Mechanical Engineering, McGill University	Supervisor: Prof. Jozsef Kovecses
25. Mr. Ying Yu	September 2012 - April 2017
Dept. of Mechanical Engineering, McGill University	Supervisor: Prof. Luc Mongeau
26. Mr. Waqas Khan	September 2012 - August 2016
Dept. of Mechanical Engineering, McGill University	Supervisor: Prof. Meyer Nahon
27. Mr. Sheldon Andrews	September 2012 - August 2013
School of Computer Science, McGill University	Supervisor: Prof. Paul Kry

Doctoral Theses Reviewed As Internal Examiner at McGill University

As an internal examiner at McGill University, reading the student's thesis and writing of a comprehensive evaluation report is required.

1. Mr. Yaojie Cai	June 2025
Dept. of Electrical and Computer Engineering, McGill University	Supervisor: Prof. Xiaozhe Wang
2. Mr. Xu Dai	April 2024
Dept. of Mechanical Engineering, McGill University	Supervisor: Prof. Jozsef Kovecses
3. Mr. Chen Chen	September 2023
Dept. of Mechanical Engineering, McGill University	Supervisor: Prof. Jozsef Kovecses
4. Ms. Imen Jendoubi	September 2022
Dept. of Electrical and Computer Engineering, McGill University	Supervisor: Prof. Francois Bouffard
5. Mr. Ahmad Haidar	March 2013
Dept. of Electrical and Computer Engineering, McGill University	Supervisor: Prof. Benoit Boulet
6. Ms. Nona Abolfathi Nobari	February 2013
Dept. of Mechanical Engineering, McGill University	Supervisor: Prof. Arun Misra
7. Mr. Farzin Taringoo	September 2012
Dept. of Electrical and Computer Engineering, McGill University	Supervisor: Prof. Peter Caines
8. Mr. Torsten Liesk	April 2012
Dept. of Mechanical Engineering, McGill University	Supervisor: Prof. Meyer Nahon
9. Mr. Danial Alizadeh	March 2012
Dept. of Mechanical Engineering, McGill University	Supervisor: Prof. Jorge Angeles

Master Theses Reviewed As Internal Examiner at McGill University

As an internal examiner at McGill University, reading the student's thesis and writing of a comprehensive evaluation report is required.

|--|---|
| 1. Ms. Reihaneh Ghoroghchian, M.Sc.
Dept. of Electrical Engineering, McGill University | September 2023
Supervisor: Prof. Peter Caines and Prof. Aditya Mahajan |
| 2. Mr. Daniel Kong, M.Sc.
School of Computer Science, McGill University | September 2023
Supervisor: Prof. Paul Kry |
| 3. Mr. Jad Wehbeh, M.Sc.
Dept. of Mechanical Engineering, McGill University | June 2022
Supervisor: Prof. Inna Sharf |
| 4. Mr. Jack Minnetian, M.Sc.
Dept. of Electrical Engineering, McGill University | September 2021
Supervisor: Prof. Derek Nowrouzezahrai |
| 5. Mr. Sahand Rezaei-Shoshtari, M.Eng. (Thesis)
Dept. of Mechanical Engineering, McGill University | February 2020
Supervisor: Prof. Inna Sharf |
| 6. Mr. Patrick Abouzakhm, M.Eng. (Thesis)
Dept. of Mechanical Engineering, McGill University | April 2016
Supervisor: Prof. Inna Sharf |
| 7. Ms. Mirunalini Thirugnanasambandam, M.Eng. (Thesis)
Dept. of Mechanical Engineering, McGill University | April 2012
Supervisor: Prof. Mathias Legrand |
| 8. Ms. Wing Yan Edith Mak, M.Eng. (Non-Thesis)
Dept. of Mechanical Engineering, McGill University | January 2012
Supervisor: Prof. Jorge Angeles |
| 9. Mr. Francis Bellefeuille, M.Eng. (Thesis)
Dept. of Mechanical Engineering, McGill University | December 2011
Supervisor: Prof. Arun Misra |
| 10. Mr. Florian Shkurti, M.Sc.
School of Computer Science, McGill University | October 2011
Supervisor: Prof. Gregory Dudek |

Doctoral Candidate Committees at the University of Michigan

As a member of a doctoral committee at the University of Michigan, thesis reading, thesis evaluation including a report, and defence attendance is compulsory.

- | | |
|--|--|
| 1. Mr. Frantisek Sobolic
Dept. of Aerospace Engineering, University of Michigan | September 2013 - August 2015
Supervisor: Prof. Dennis Bernstein |
| 2. Mr. Khaled Aljanaideh
Dept. of Aerospace Engineering, University of Michigan | September 2013 - May 2015
Supervisor: Prof. Dennis Bernstein |
| 3. Mr. Gerardo Cruz
Dept. of Aerospace Engineering, University of Michigan | September 2013 - December 2014
Supervisor: Prof. Dennis Bernstein |
| 4. Mr. Justin Rufa
Dept. of Aerospace Engineering, University of Michigan | September 2013 - July 2014
Supervisor: Prof. Ella Atkins |

Doctoral Theses Reviewed As External Examiner for Other Institutions

Thesis reading, thesis evaluation including a report, is compulsory. In some cases, attending the defence in person or online was required.

- | | |
|--|---|
| 1. Mr. Kevin Course
University of Toronto | January 2025
Supervisor: Prof. Prasanth Nair |
| 2. Mr. Tarek Bouazza
Université Côte D'Azur | December 2024
Supervisor: Prof. Tarek Hamel |
| 3. Mr. Roland Jung
Control of Networked Systems Group, University of Klagenfurt | October 2023
Supervisor: Prof. Stephan Weiss |

- | | |

| 4. Mr. Seyed Mohammadmoein Mousavi | August 2023 |
| Dept. of Chemical Engineering, Queen's University | Supervisor: Prof. Martin Guay |
| 5. Mr. Reza Babazadeh | December 2021 |
| Dept. of Electrical and Computer Engineering, Concordia University | Supervisor: Prof. Rastko R. Selmic |
| 6. Mr. Meysam Effati | June 2020 |
| Dept. of Electrical and Computer Engineering, Concordia University | Supervisor: Prof. Krzysztof Skonieczny |
| 7. Mr. Paul Chauchat | January 2020 |
| Mines ParisTech, PSL Research University | Supervisor: Prof. Silvère Bonnabel and Dr. Axel Barrau |
| 8. Mr. Hossein Beikzadeh | January 2014 |
| Dept. of Electrical and Computer Engineering, University of Alberta | Supervisor: Prof. Horacio Marquez |

Teaching and Instruction

McGill University

University of Michigan

University of Toronto (as a Teaching Assistant)

Course Number	Title	Level	Semester	Enrollment
MECH 220	Mechanics 2	Undergraduate	Winter 2012	118
MECH 309	Numerical Methods in Mech. Eng.	Undergraduate	Winter 2019	91
			Fall 2021	88
			Fall 2022	89
			Fall 2023	91
			Fall 2024	91
MECH 412	System Dynamics and Control	Undergraduate	Fall 2015	63
			Winter 2016	99
			Winter 2017	83
			Fall 2017	75
			Winter 2018	95
			Fall 2018	76
			Winter 2021	105
			Winter 2022	114
			Fall 2023	67
			Fall 2025	55
MECH 403/404	Honours Thesis	Undergraduate	Fall 2025	22
			Winter 2026	XX
MECH 513*	Control Systems (Linear Systems)	Undergraduate/Graduate	Fall 2012	33
			Fall 2016	44
			Winter 2021	23
			Winter 2022	26
			Winter 2023	31
			Winter 2024	35
			Winter 2025	16
			Fall 2025	49
MECH 542	Spacecraft Dynamics	Undergraduate/Graduate	Fall 2012	21
MECH 642	Advanced Dynamics	Graduate	Winter 2019	23
			Winter 2025	18
MECH 672	Estimation and Control of Rob. & Aero. Sys.	Graduate	Winter 2016	10
			Winter 2018	18
			Fall 2020	9

Table 1: Undergraduate and graduate courses taught at McGill University. Courses listed in parentheses are cross listed. *Cross-listed with ECSE 501 in 2012 & 2016.

Course Number	Title	Level	Semester	Enrollment
AERO 347	Space Flight Mechanics	Undergraduate	Winter 2014	45
			Winter 2015	44
AERO 540 (MECH 540)	Intermediate Dynamics (Intermediate Dynamics)	Graduate	Fall 2014	67

Table 2: Undergraduate and graduate courses taught at the University of Michigan. Courses listed in parentheses are cross listed.

Course Number	Title	Level	Semester
ECE 410	Control Systems	Undergraduate	Fall 2011
AER 301	Classical Mechanics	Undergraduate	Fall 2008 Fall 2009
AER 525	Robotics	Undergraduate/Graduate	Fall 2006 Fall 2007
AER 1513	Spacecraft Dynamics and Control 2	Graduate	Winter 2011
APS 1003	Professional Education and Instruction	Graduate	Summer 2009 Summer 2010

Table 3: Undergraduate and graduate courses TAed at the University of Toronto.

Industrial Work Experience and Consulting

November 2024 - Present	<i>Sonardyne International</i> , Yateley, UK Job title: Strategic Advisor. Job description: Provide guidance on various aspects of subsea navigation.
2019	<i>Samsung Artificial Intelligence Center</i> , Montreal, QC Job title: Consultant. Job description: Consulted on various aspects of robot navigation.
November 2016	<i>Kitty Hawk Aerospace</i> , Palo Alto, CA Job title: Consultant. Job description: Consulted on various aspects of UAV navigation and control.
May - August 2013, February 2010, June 2009	<i>G & M Engineering</i> , Burlington, ON Job title: Consultant. Job description: Structural and dynamic analysis of automated material handling equipment.
April - August 2006	<i>National Steel Car</i> , Hamilton, ON Job title: Design engineer and finite element modelling analyst. Job description: Finite element modelling/analysis and optimization of railway car structures, substructures, and components.
September - December 2005	<i>MechDes Engineering</i> , Nunspeet, The Netherlands Job title: Machine design engineering student. Job description: Design, simulation, and modelling of automated welding equipment.
January - April 2005	<i>Nutech Engineering</i> , Milton, ON Job title: Automation engineering student. Job description: PLC programming and electrical system design including motion control, fault and safety logic.
November 2004	<i>Abtron Automation</i> , Stratford, ON Job title: Automation consultant. Job description: Design of software algorithm to determine tool-path of five axis CNC machine.
May - August 2004	<i>Burlington Automation</i> , Burlington, ON Job title: Machine design engineering student. Job description: Designed and built an automated material handling, measuring, and cutting system.
September - December 2003	<i>Thru-Way Trailer</i> , Milton, ON Job title: Manufacturing engineering student. Job description: Commissioning of CNC plasma cutting machines. Design of automated welder to manufacture flat-bed trailers.
January - April 2003	<i>National Steel Car</i> , Hamilton, ON Job title: Jig design engineering student. Job description: Design of railway car jigs and fixtures for railway car manufacturing.

April - August 2002

Eldorado Tool and Manufacturing, Waterloo, ON

Job title: General machinist and welding student.

Job description: Manufacturing of parts using manual and CNC lathes and milling machines. Arc (SMAW) and Mig (GMAW) welding, oxy-acetylene cutting, fixture design.

1999 - 2004

Spokes and Slopes, Milton, ON

Job title: Bicycle mechanic, ski technician, sales representative.

Job description: Certified bike mechanic (Level 1) responsible for all aspects of bicycle repair and maintenance.

Industry Related Software Skills

Computer Aided Design: Solid Works, Solid Edge, AutoCAD, Inventor, ProEngineer.

Computer Programming: python, matlab, Visual Basic, C, C++, Pascal, Delphi, MathCAD.

General: L^AT_EX, Microsoft products.
